

# Generator Development & Tuning status

Andy Buckley & Stefan Gieseke

- Invitations sent in August and October to LHC experiments & MC developers
- No abstract submissions so far; several informal agreements with non-experiment individuals/groups (category 1)
  - Johannes Bellm (Lund) — Autotuning (availability unclear, will chase)
  - Holger Schulz (FNAL) — Empirical definition of tuning uncertainties
  - Klaus Werner (Subatech) — EPOS development
  - Will pursue further talks from main MC development teams
- Experiments (category 2)
  - ALICE will not submit an abstract
  - CMS and ATLAS unclear, but it's on their radar at group and coordination levels
  - No reply from LHCb (this is off-axis for them, but have invited anyway)
- No category 3 & 4 at present
