

# 10th International Workshop on Multiple Partonic Interactions at the LHC MPI@LHC 2018

## Status of theoretical speaker invitations:

### Almost yes:

- ✓ Christian Weiss: Nucleon geometric structure and hard and soft correlations
- ✓ Antoni Szczurek
- ✓ Sabrina Cotogno or Tomas Kasemts: spin correlations in same sign WW production
- ✓ Federico Alberto Ceccopieri:
  - 1) correlations effects in same sign WW production
  - 2) pion dPDFs
  - 3) proton structure from effective X-section
- ✓ Jonathan Gaunt:
  - 1) overview + specific talk? Solution: a) 2 talks b) 5'+15'
  - 2) talk on Monday/Tuesday
- ✓ Marco Radici: EIC status
  - 1) talk on Tuesday or Wednesday morning

### Submitted Abstract:

- ✓ Jean-Philippe Lansberg: DPS in associated-quarkonium production

### Waiting answers:

- ✓ Andreas Schaefer: Two-body correlations in lattice QCD

# 10th International Workshop on Multiple Partonic Interactions at the LHC MPI@LHC 2018

## Status of experimental speaker invitations:

### Confirmed by corresponding speakers bureau/conference committee

- ✓ ATLAS
  - ✓ Suggested overview talk: “Double parton scattering in the final states with jets” (15')
- ✓ LHCb
  - ✓ Suggested overview talk: “Studies of the Double parton scattering through heavy flavours production” (15')

### Waiting answers:

- ✓ CMS
  - ✓ Suggested overview talk: “Studies of the double parton scattering using massive vector bosons” (15')
- ✓ Tevatron
  - ✓ Suggested talk: “Double parton scattering at the Tevatron”

### Submitted Abstract:

- ✓ Sunil Bansal et al: Jet substructure as a tool to study Double parton scatterings in  $V + \text{jets}$  processes at the LHC

For the LHC experiments a possibility of additional talks is also announced in case if they have any suggestions on their own
