## Lattice study of meson properties at fine temperature using the truncated overlap fermions

Tuesday 18 June 2019 19:30 (20 minutes)

We study the meson properties at fine temperature using the quenched simulations with truncated overlap fermion formalism. We explore the screening masses in rather heavy mass regions. We observe the tendency that the screening masses in all the channels are degenerate at high temperature.

Author: Dr WADA, Hiroaki (Kokushikan University)

**Co-authors:** Dr NAKAMURA, Atsushi (Far Eastern Federal University, RCNP, Osaka Univ., Nishina Center, RIKEN); Dr WAKAYAMA, Masayuki (Research Center for Nuclear Physics, Osaka University); Prof. SEKIGUCHI, Motoo (Kokushikan University); Dr MURAKAMI, Yuko (Research and Development Laboratory, Seikow Chemical Engineering & Machinery, LTD)

Presenter: Dr WADA, Hiroaki (Kokushikan University)

Session Classification: Poster

Track Classification: Nonzero Temperature and Density
