## Case studies of near-conformal and conformal beta-functions

*Thursday 20 June 2019 15:00 (20 minutes)*

We give an update on our lattice studies of the beta-function for near-conformal and conformal gauge theories. These include 10, 12 and 13 flavors in the fundamental representation, and 2 flavors in the sextet representation of  $SU(3)$ . We discuss the overall trends and new developments.
