Slot for regular plenary meetings

- Well, perhaps not so regular – say once every two or three months in steady state, more frequently than once per month before deadlines
- Doodle is open – please cast your vote:

Wiki

- Last time, decided to use Twiki at CERN
- With lists at CC-IN2P3, access control needs additional list at CERN
- Re-consider mailing list at CC-IN2P3, or Twiki at CERN?

FAQ

- What does the work consist of?
- My proposal: Starting point is current Twiki <https://twiki.cern.ch/twiki/bin/view/Main/TechMarketPerf> and latest presentation (HEPiX Madison): <https://indico.cern.ch/event/676324/contributions/2964768/>
- Obvious first step: update all info therein

Any Other Business

- Follow-up / list of actions
- Date of next (plenary) meeting
