

Architects Forum, April 2019

G Ganis, EP-SFT

Today's topic

- The SWAN project: a status report
- SWAN is a service for web-based data analysis in the cloud combining CERN IT services with modern technologies of distributed computing, such as synchronised cloud storage.
- Developed as a joint project by EP-SFT/IT, is currently a IT (pilot) service available at

<http://swan.cern.ch/>

4 April 2019
