

# Setup for the TN exercise

Patrick Emons

1. Import the github project into SWAN by clicking the following link : <https://cern.ch/swanserver/cgi-bin/go/?projurl=https://github.com/patrickemonts/icsc2019-tn.git>
2. Select a software stack **with** Python 3 support. I tested it with software stack “94 Python 3”
3. Have fun with the exercises
