

Blois 2019: 31st Rencontres de Blois on "Particle Physics and Cosmology"

Wednesday 5 June 2019

Parallel Session Astro+Cosmo (14:00 - 16:00)

-Conveners: Ed Copeland

time	[id] title	presenter
14:00	[351] An updated measurement of the Hubble constant from H0LiCOW	RUSU, Cristian
14:20	[361] South Pole Telescope Status and prospects	REICHARDT, Christian
14:40	[362] BICEP/Keck	PRYKE, Clement
15:00	[363] The Simons Observatory: status and prospects	NATI, Federico
15:20	[455] BAO measurement based on Lya forests	DE SAINTE AGATHE, Victoria
15:40	[384] What will the largest neutrino telescopes tell us about solar flares?	DE WASSEIGE, Gwenhaël

Parallel Session Astro+Cosmo (16:30 - 19:30)

-Conveners: Denise Boncioli

time	[id] title	presenter
16:30	[348] Recent Results from ANTARES	ILLUMINATI, Giulia
16:50	[347] Cosmic Tau Neutrinos and the Astrophysical Neutrino Flavor Composition	STACHURSKA, Juliana
17:10	[340] Radio Neutrino Astronomy	GARCÍA FERNÁNDEZ, Daniel
17:30	[341] HAWC: Results and Prospects	Dr SCHOORLEMMER, Harm
17:50	[346] EBL and Star Formation History from Fermi Data	DOMINGUEZ, Alberto
18:10	[350] The transient sky at very-high energies: the MAGIC observations in the multi-messenger context	STAMERRA, Antonio
18:30	[359] News from the very-high-energy sky with H.E.S.S.	ZECH, Andreas
18:50	[349] Recent highlights from VERITAS	HERVET, Olivier
19:10	[383] Highlights from the VERITAS Radio Galaxy Observation Program	FORTSON, Lucy
