Introduction to the DOMA General Meeting

Simone Campana, Maria Girone

CERN

Today's meeting

Focuses on archive storage:

- Processing not-so-frequently-accessed-data (a.k.a. "cold data") from high latency and low cost media (today a.k.a. TAPE) => "Tape Carousels"
- Archive storage Working Group and the ongoing activities. Technology evolution. Synergy with the work ongoing in QoS DOMA activity.
- Inputs from experiments: plans, prospects, strategies, concerns, ongoing efforts Name one.

We should then try to understand how those initiatives will proceed coherently

Finally, a quick roundtable of other DOMA activities in the AOB

Next DOMA meeting

- The normal schedule says December 26. No good.
- Proposal is to move it to Wed 12th of December (just after the GDB)
- Will focus on network and progress in the various network related R&Ds
- We should also have a more detailed roundtable of updates from the DOMA activities

Other Meetings

Heads up on:

- Pre-DGB on Tue 11 Dec 2018 on AAI (DOMA presentation from A. Ceccanti)

- ESCAPE kick-off meeting on 7-8 Feb 2019 in Annecy

- Rucio community workshop: Feb 28 and Mar 1 2019 in Oslo

- WLCG/HSF/OSG workshop in JLAB (Virginia, US) on 18-22/03/2019. Block agenda will be available soon and soon will open the registration. Half-day of DOMA session there is foreseen.
