

Unified colour/name scheme

the bloody dog is dead

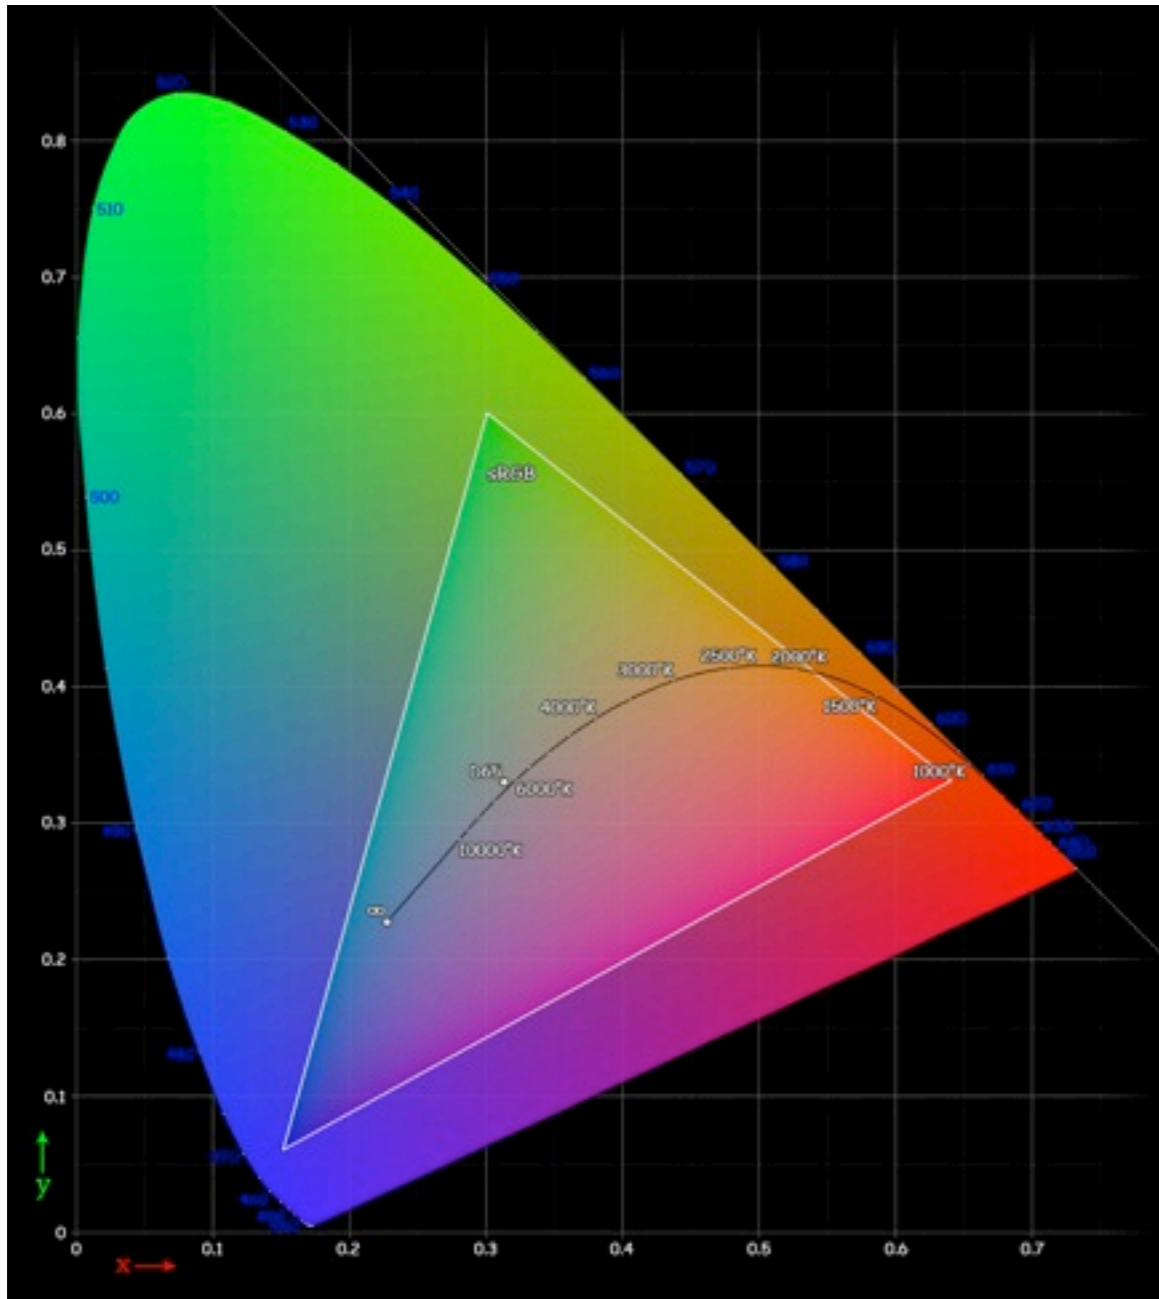

Graeme Stewart

Cloud Names

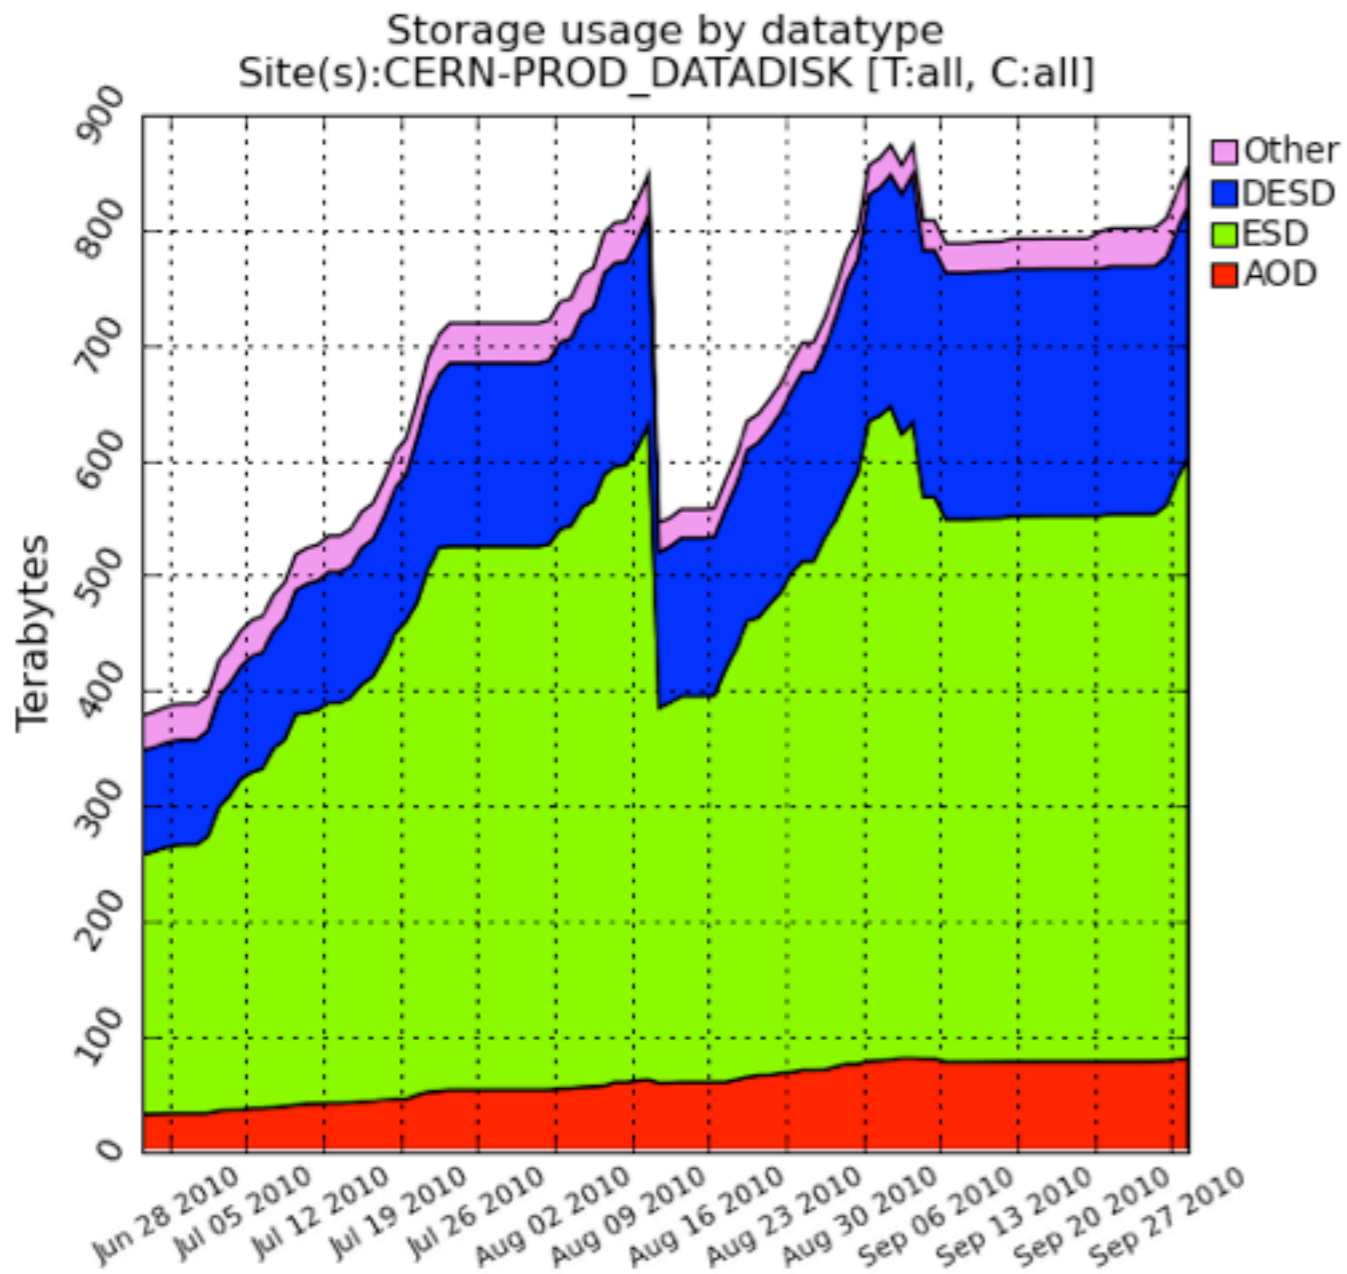

- Tier-1 Country, with 2 exceptions:
 - CA, **CERN**, DE, ES, FR, IT, **ND**, NL, TW, UK, US

Colour Considerations

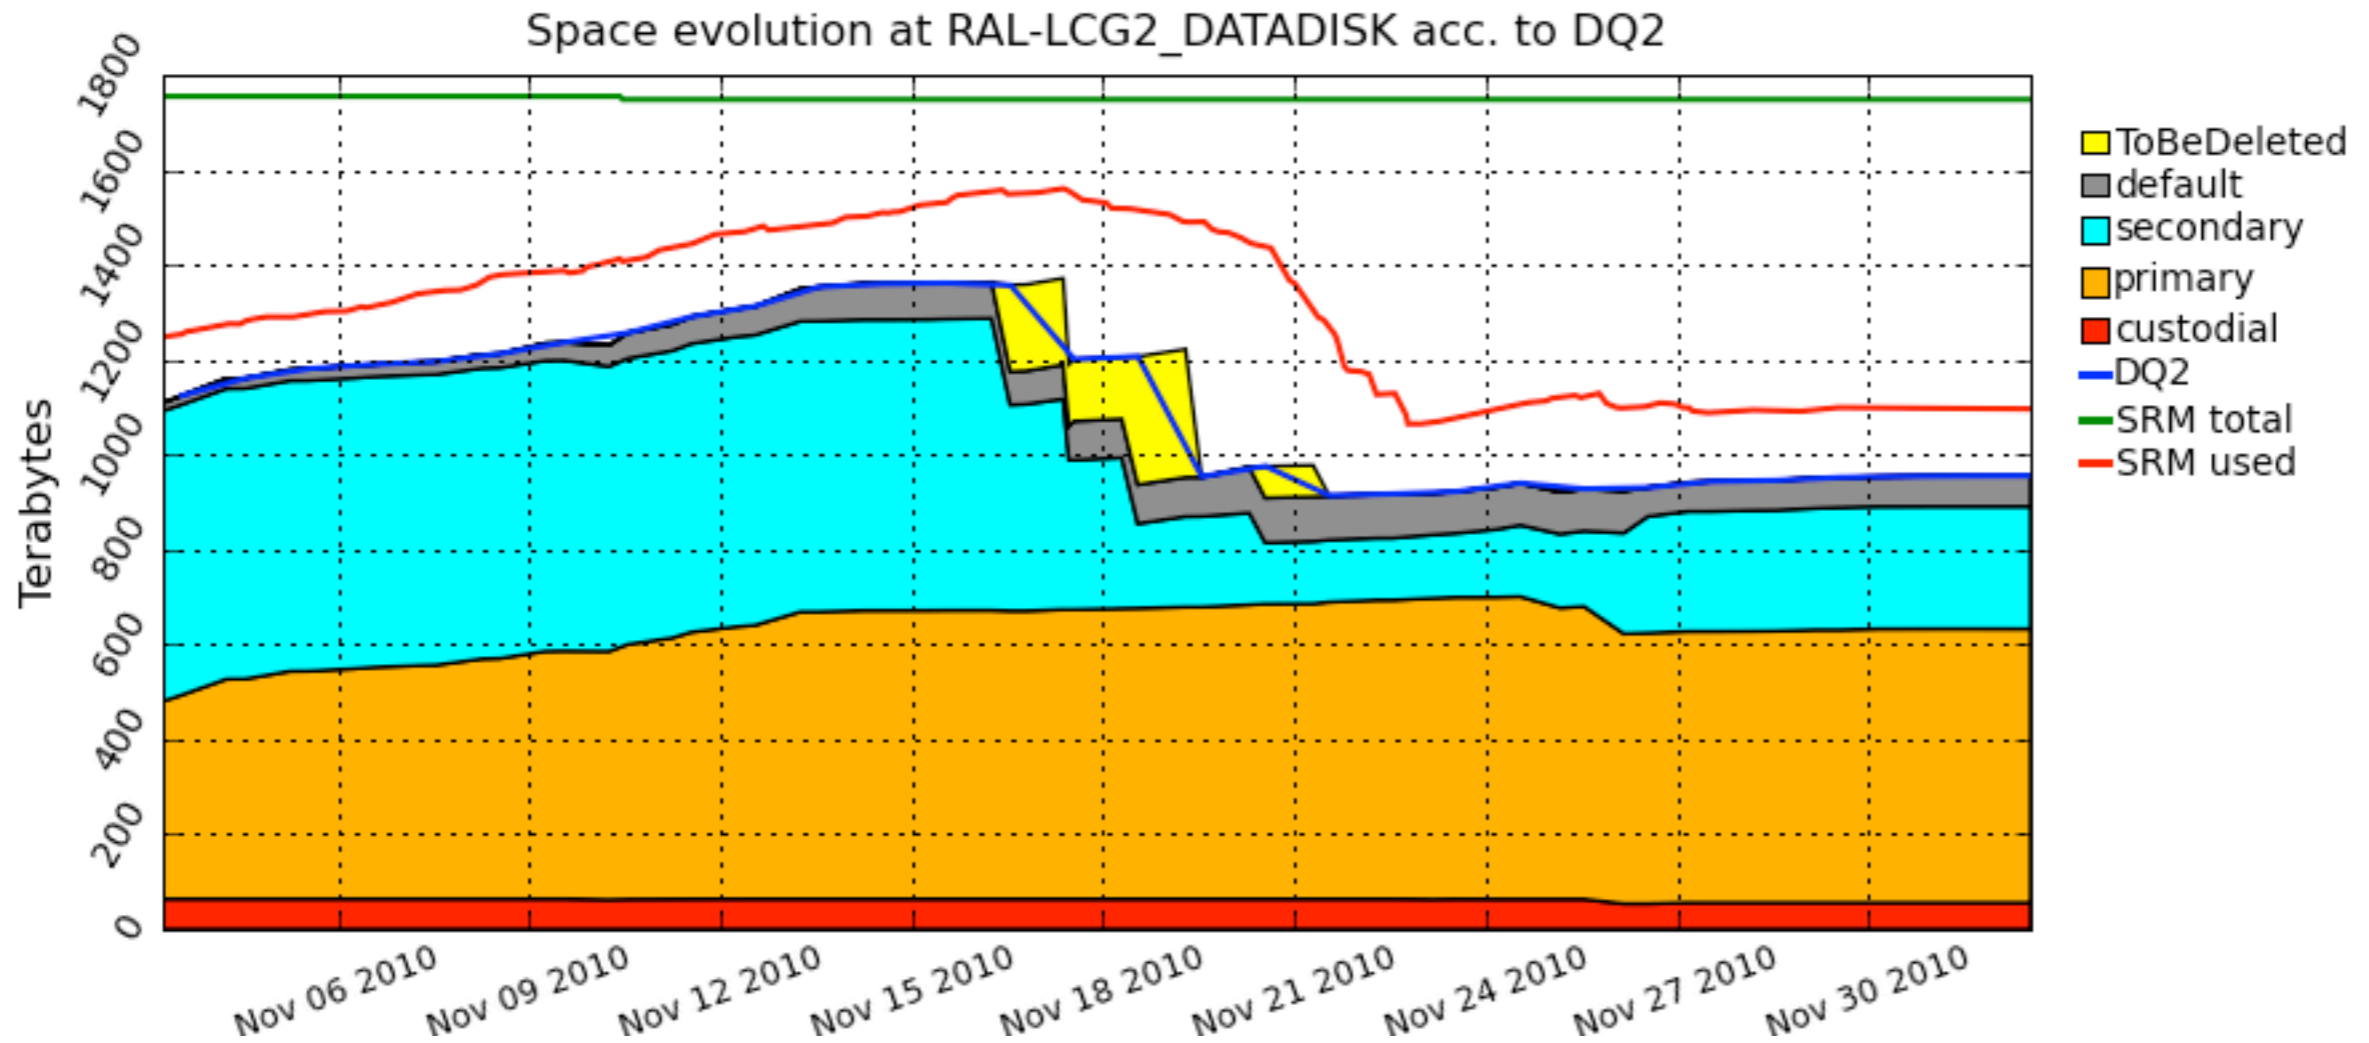

- Use sRGB colour space
- Well defined standard and ‘designed to match typical home and office viewing conditions’
- For colour blindness, I tested against deuteranopia simulator

Then data and stuff...
