

Getting started with Jupyter notebooks and machine learning

Tuesday, 20 November 2018 10:30 (2 hours)

Machine learning is one of the biggest buzzwords in the field of data science and it has many applications within both academia and industry. In this tutorial, Pivigo's community manager and a data scientist will take you through the basics of using Jupyter notebooks and how to get started with machine learning. Jupyter notebooks are a fantastic way to explore data and to conduct experiments on the data. He will be using the titanic dataset on Kaggle.

Presenter: MAHTANI, Deepak

Session Classification: Tuesday Morning Training Session
