

Where are we with various items

- General information (good run list, logbook scans, etc.):
 - <https://twiki.cern.ch/twiki/bin/view/DREAM/DreamTBSeptember2018>
- Data availability:
 - Raw datasets for calorimeter + ancillaries, GEM + micro-RWell, drift chamber and histos for calorimeter and ancillaries available at <http://90.147.170.185>
 - Grid access still to be finalised
 - Combined (calo + ancillaries + GEM + micro-Rwell) available as well for most of the RD52 calorimeter - see talk from G. Lerner - feedback needed: is the format complete/right?
- Analysis:
 - Particle selection with ancillaries: see talk from S. Jones.
 - See contributions on SiPM calorimeter module from M. Antonello.
