WE HAVE APPROX 1 Hour AVAILABLE FOR DEMOS or extras such as:

- Demo of NGI level operational tools. E.g. Poland or GRNET to show how they manage their infrastructure with the NGI deployed services and NGI views of the operational tools.
  - Would illustrate the move from ROC to NGI operations and the evolution of the operational tools that has taken place in EGEE-III and still has to take place.
- Demo of the EUForia framework (e.g. Marcin Plociennik did a good presentation this at OGF28 and at SC09)
  - Would show interoperability between various e-infrastructures (reflecting the work of IPG and EEF that EGEE-III has been involved in) and user activity done on the European E-infrastructure.
- A summary of EGEE outside Europe. At ISGC10 there were a theme in a couple of presentations we could pick up on...' how has EGEE-III changed the way I do my research'.
