## Federated User Account Management

*Tuesday, November 5, 2019 4:15 PM (15 minutes)*

BNL SDCC (Scientific Data and Computing Center) recently enabled centralized identity management solution. With SSO authentication process being enabled to cross multiple IT systems or organizations including federated login access via CILogon InCommon. With the combination of MFA/DUO to meet security standards for various application & services such as Jupyterhub/Invenio provided to the communities. CoManage (Cloud) and FreeIPA / Keycloak (local) are utilized to provide complex authorization for authenticated users. This talk will focus on technical overviews and strategies to tackle the challenges/obstacles in our facility.
