Computing for the general public at CERN's Science Gateway

Tuesday, November 5, 2019 4:15 PM (15 minutes)

CERN is launching the Science Gateway, a new scientific education and outreach centre targeting the general public of all ages. Construction is planned to start in 2020 and to be completed in 2022. In addition to Physics exhibits, the Science Gateway will include immersive, hands-on activities that explore Computer Science and Technology. This poster will present the methodology used to generate the content for the computing installations and showcase the ongoing progress towards bringing the concepts to life.
