Track Highlights and Proceedings

Caterina Doglioni, Doris Kim, Graeme Stewart, Lucia Silvestris
For the CHEP2019 Programme Committee
The Programme Committee

- The CHEP2019 programme committee was your 4 PC chairs and 37 other colleagues from our field
Thanks!

- To the **track convenors** for all their work
  - Reading, selecting and arranging the papers in each track
  - For chairing the parallel sessions and making sure everything was smooth

- And to **all of you** for contributing the material that made this such a successful conference
But your work is not yet done!

- The CHEP2019 proceedings will be published in EPJ Web of Conferences
  - See, e.g., CHEP2018 from Sofia proceedings
- Author instructions and templates and are available for LaTeX and Word
  - We recommend about 6 pages for parallel contributions and 8 for plenaries (excluding references)
  - Please use the single column layout
- Detailed submission instructions will follow in the next few weeks
- The deadline for submitting your papers is February 14 2020

The CHEP Proceedings are an very valuable resource for the community and we strongly encourage you to submit your work
But there’s more!

- There is incredible work being done in our community
- Often this work goes not well recognised in an academic sense
- We can do better!

**Develop your work for publication in an academic peer-reviewed journal that publishes software and computing articles in our field**

- E.g. [Computing and Software for Big Science](#)
  - Or look at this very useful list from the UK Software Sustainability Institute
