

# The 6th Conference of the Polish Society on Relativity

## Wednesday, September 25, 2019

### Student's Talks (11:00 AM - 1:00 PM)

-Conveners: Vincenzo Salzano

| time  | [id] title  | presenter             |
|-------|---|-----------------------|
| 11:00 | <del>A31</del> Holographic SQUID and detection of dark matter                 | Mr KICZEK, Bartłomiej |
| 11:20 | <del>A30</del> Gravitational wave Memory Effect                               | Mr NAQVI, Syed        |
| 11:40 | <del>A22</del> Topologically Supported Cosmological Constant                  | Mr KLIMASARA, Paweł   |
| 12:00 | <del>P30</del> Decaying Massive Scalar in the Early Universe                  | Mr LANKINEN, Juho     |
| 12:20 | <del>P34</del> Extended quantum uncertainty in the presence of horizons       | WAGNER, Fabian        |
| 12:40 | <del>P01</del> Quantum Big Bounce scenario and primordial gravitational waves | MIROSZEWSKI, Artur    |

# Thursday, September 26, 2019

## Student's Talks: Student's Talks (12:20 PM - 1:00 PM)

-Conveners: Edward Malec

| time  | [id] title   | presenter          |
|-------|--|--------------------|
| 12:20 | <del>P11</del> Antisymmetric Tensors in Friedmann Cosmology                    | NILSSON, Nils A.   |
| 12:40 | <del>P16</del> Anti-evaporation of Schwarzschild-deSitter black hole revisited | KOLANOWSKI, Maciej |
