Status and update: INFN (M. Sorbi, S. Farinon?)

Status and update: PSI (B. Auchmann)

Status and update: University of Patras (H. Kokkinos?)

Status and update: University of Tampere (T. Salmi and E. Coatanea?)

AOB

Ideas for promoting a forum of discussion beyond the EuroCirCol

- After the end of EuroCirCol (so probably after March 2019) we propose to have every 1-2 months one joint informal meeting of the institutes involved in the development of high-field magnets for a future circular collider to foster the exchange of information. The list of involved institutes can be easily extended/changed as it is an informal platform.
- This meeting would have to take place at around 5-7 pm to allow participation from the US and Europe
- It is also planned to continue the FCC week, so in addition to these video meetings, we would have one meeting/year in person.
