Hardware commissioning across the injector complex

Friday 15 February 2019 09:00 (30 minutes)

o Keywords:

- strategy, check lists, applications, IST, tools, potential issues

o Points to be addressed and questions to be answered :

- Addressing HWC across the injector complex (considering current and new LIU equipment)
- Review of commissioning strategy, planning and check lists
- Review the required status of controls and applications and identify additional needs
- What are the critical IST during hardware commissioning (for the different machines)?
- Are the available tools ready to be used or are modifications necessary?
- Can potential unknowns or issues be identified already at this stage?

Presenter: RIDEWOOD, James (CERN)

Session Classification: Session 3: LIU hardware and beam commissioning
