

# Zimányi School 2018

## Monday, December 3, 2018

### Jets and QCD matter - Bldg 3, Council room (2:00 PM - 3:40 PM)

time	[id] title	presenter
2:00 P	<b>M10</b> Physics of small systems using underlying event observables	ORTIZ VELASQUEZ, Antonio
2:20 P	<b>M11</b> Spectra and flow of light nuclei in relativistic heavy ion collisions at RHIC and the LHC	ZHU, Lilin
2:40 P	<b>M12</b> Low pT direct photons in heavy ion collisions	Mr SUN, Zhandong
2:55 P	<b>M13</b> Study of angular correlations in Monte Carlo Simulations	SZIGETI, Balazs Endre
3:10 P	<b>M14</b> Estimating the variation of neutron star observables by dense nuclear matter properties	PÓSFAY, Péter
3:25 P	<b>M15</b> Neutron star properties from the extended linear sigma model	Mr TAKÁTSY , János
