

ITF discussion

discussion

- APA test at cold done at the construction sides ?
- ITF building 4 m high ?
- Transport box such that ITF integration requires taking out the APA from the box for integration ?

discussion

- ITF (photon and CE integration) in the cavern by increasing the size of the clean room ?
 - *it could work if the time of integration is the same time an APA spend in the big cold box*
 - *it minimizes transport and manipulation risks*
 - *it requires a bigger clean room*
 - *it requires more APA towers? PD inserted with APA vertical?*

discussion

- ITF at FNAL?

- *ITF can start early*

- *Just CE installed?*

- *Where PD?*

- *More transport and manipulations*

- *Storage much easier*

discussion

- ITF at in SD (near to SURF or at SURF) ?
 - *ITF can start early*
 - *More transport and manipulations*
 - *Storage additional requirements*
 - *1000mq building*
