

Radiation effect sand hardness assurance for space electronics

Thursday 16 May 2019 10:15 (45 minutes)

Survival and successful operations of space instrumentation in the space radiation environment cannot be ensured without careful consideration of the effects of radiation. The lecture will start with a presentation of the space environment. Then, after a short introduction of radiation effects in electronic parts the process of radiation hardness assurance for space instrument electronics will be presented step by step.

Presenter: POIVEY, christian (ESA ESTEC)
