

# Practical Work @ CERN Normal Conducting Magnets

Part 1: Magnet Technology, Production and Testing

Thursday 28<sup>th</sup> February & Friday 1<sup>st</sup> March 2019, 9:00 – 17:00

jeremie.bauche@cern.ch

### Outline

Normal Conducting Magnets at CERN

- Program and Organization of Magnet Practical Works
  - Magnet Technology, Production and Testing
  - Magnetic Measurements

#### TE-MSC

### Magnets, Superconductors & Cryostats

**Staff Members** 

Deputy Group Leader A. DEVRED

Group Leader Office: BOTTURA DEVRED J.Ph. TOCK TODESCO TOMMASINI Secretariat: HERVET

~100 staff members **Group Leader** L. BOTTURA

~ 30 fellows

~ 20 students

~ 50 associates

~ 50 industrial contractors

+ some more externals

Cryostats & **Machine Integration**

# CERN

# **CERN Normal Conducting Magnets**

- LHC Large Hadron Collider SPS Super Proton Synchrotron PS Proton Synchrotron
- AD Antiproton Decelerator CTF3 Clic Test Facility AWAKE Advanced WAKefield Experiment ISOLDE Isotope Separator OnLine DEvice
  - LEIR Low Energy Ion Ring LINAC LINear ACcelerator n-ToF Neutrons Time Of Flight HiRadMat High-Radiation to Materials

- About 20 km of beam lines in 16 different machines, all interconnected
- ~ 5000 installed magnets + ~ 2000 stored magnets → 50 000 tons

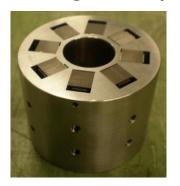

Large variety: ~ 500 different types

LINAC4 DTL PMQ, < 1 kg

LEIR main dipole, 60 tons

### The MNC Section

Design, procurement/manufacture, maintenance, consolidation, and upgrades of the normal conducting magnets in the accelerators, transfer lines and experimental areas

- Operation: maintenance and consolidation of existing machines
  - → 2 dedicated workshops treating about 100 radioactive magnets/year
  - → maintenance of installed magnets in the accelerators
  - → interventions during physics run to minimize beam downtime
- <u>Projects:</u> upgrades and new beam lines
  - $\rightarrow$  2 dedicated workshops for prototyping, tests and measurements
  - → modification or construction of new magnets for machine upgrades

(LIU, HL-LHC) or new beam lines (LINAC 4, ELENA, HIE-ISOLDE, AWAKE...)

# Operation and Maintenance

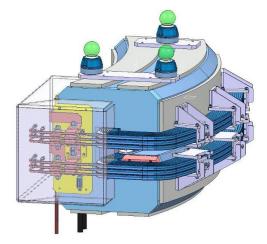

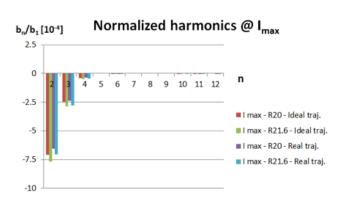

# Design and Procurement

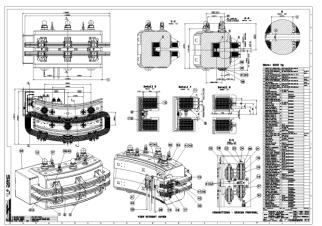

#### Magnetic design

#### Mechanical design

#### ORGANISATION EUROPÉENNE POUR LA RECHERCHE NUCLÉAIRE CERNEUROPEAN ORGANIZATION FOR NUCLEAR RESEARCH

HIE ISOI DE Project Do

Group Code: TE/MSC-MNC IT 3000/TE/HIE ISOUDE

The HIE-ISOLDE Project

#### Invitation to Tender

**Technical Specification** 

#### Beam Transfer Line Dipole Magnets for the HIE-ISOLDE Facility

electromagnets, plus one set of spare coils for the HIE-ISOLDE high energy beam transfer lines. These magnets are made of laminated steel yokes and of water-cooled coils wound from hollow copper wire. Their mass is approximately 4200 kg per magnet. Delivery shall be completed within 14 months after placement of the contract

Specifications for manufacture; follow-up in industry

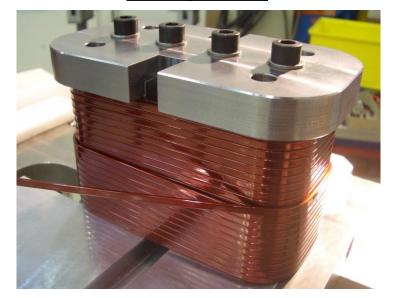

# Manufacture and Tests

**Manufacture** 

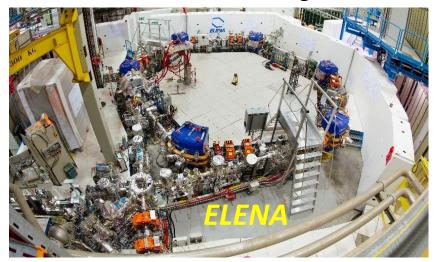

<u>Tests and measurements</u>

# Projects – at CERN

# Projects – outside CERN

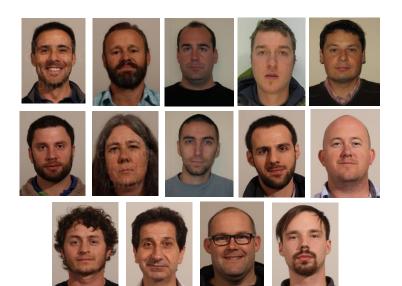

### The MNC Team

- 15 staff
- 15 fellows, students, and associates
- 13 industrial contractors

With more to come ...maybe you?

## Program and Organization of Practical days

- 8 to 12 participants/days, shared in two groups
- Split into two half-day sessions
  - Magnet manufacture and testing
  - Magnetic measurements
- Hands-on practical work in CERN laboratories
- Guided by CERN magnet experts

### Magnet Manufacture and Testing

- Introduction to magnet manufacture (1h)
  - Materials for magnets
  - Magnet components
  - Manufacturing technologies
    - Yoke manufacturing
    - Coil winding and impregnation
  - Testing and measurement techniques
- Practical work in magnet test facility (2h30')
  - Participants will perform tests and measurements on recently built magnets
  - Measurements on systems and apparatus using instruments and formulae\* learned during the theoretical courses

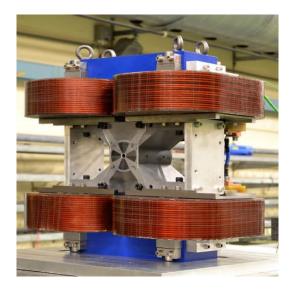

- "Magnet analytical design formulae" → timetable 12 Feb., 15:00
- "Introduction to magnets" lecture  $\rightarrow$  timetable 26 Feb., 9:00

<sup>\*</sup>See JUAS 2018 Indico page (<a href="https://indico.cern.ch/event/683638/timetable/">https://indico.cern.ch/event/683638/timetable/</a>):

## Magnet Manufacture

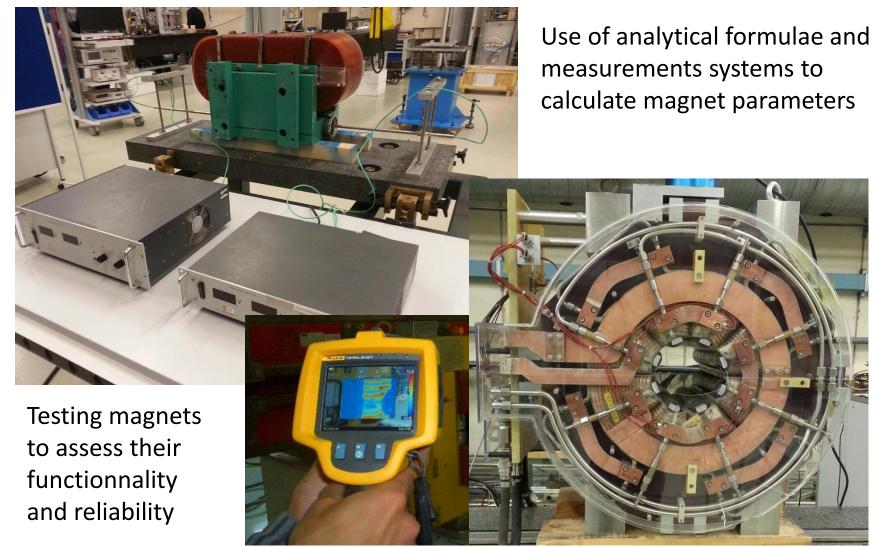

Materials, technologies, components, manufacturing processes, and assembly techniques

## Magnet Testing and Practical Applications

We are looking forward...

...to welcome you at CERN

... and unravel the mysteries of the magnets

...in a *relaxed* atmosphere!
