New materials: status (20+10)

Tuesday 12 February 2019 09:30 (30 minutes)

- Review of the performance of the MoGr without and with coating
- How can we optimize the production of MoGR?
- Other viable solutions: status of tests and validation [coated Gr or CFC]
- What is missing to validate the CuCD?

Presenter: CARRA, Federico (CERN)

Session Classification: Session 3: Specific design aspects and production status
