The **MEDICIS** facility

First operation year, current and future plans

3rd of May 2019
MEDICIS-Promed Final
Conference
Erice, Italy

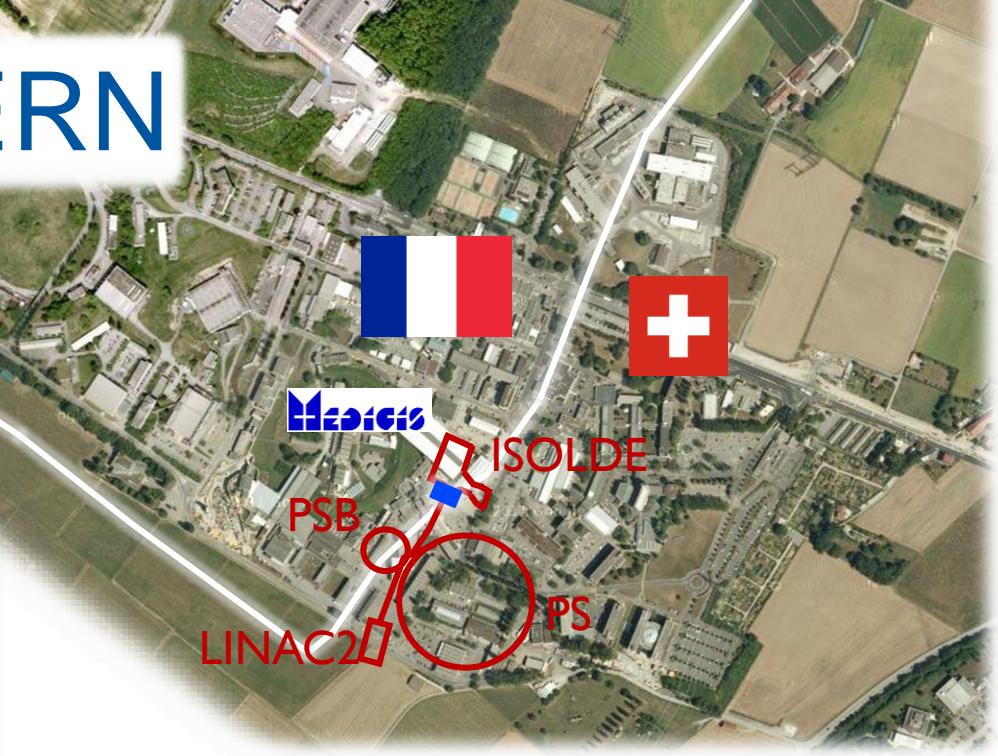

J. P. Ramos | 03/05/2019
MEDICIS-Promed Final Conference

MEDICIS at CERN

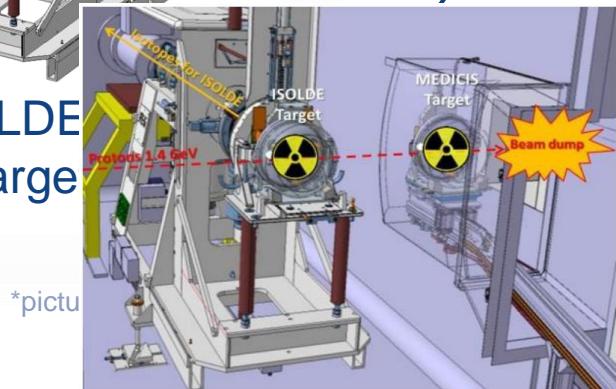

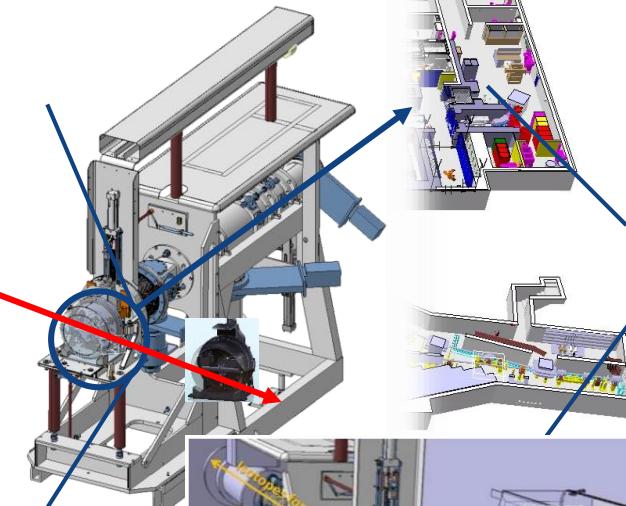

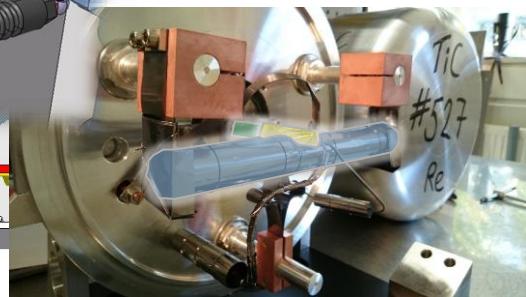

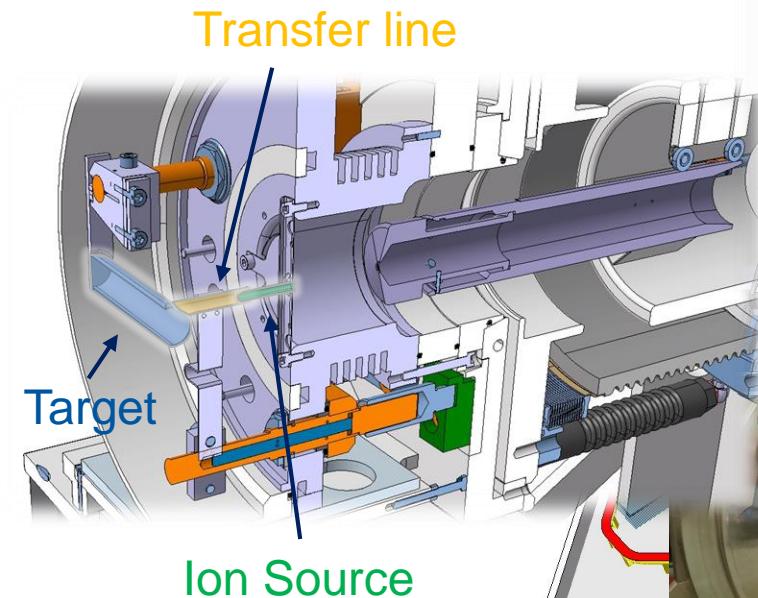

Operates ~8 months/year and during Long Shutdown

ISOLDE takes ~50% of CERN protons and MEDICIS “recycles” about 20% of the ISOLDE protons

Target Unit – Heart of MEDICIS

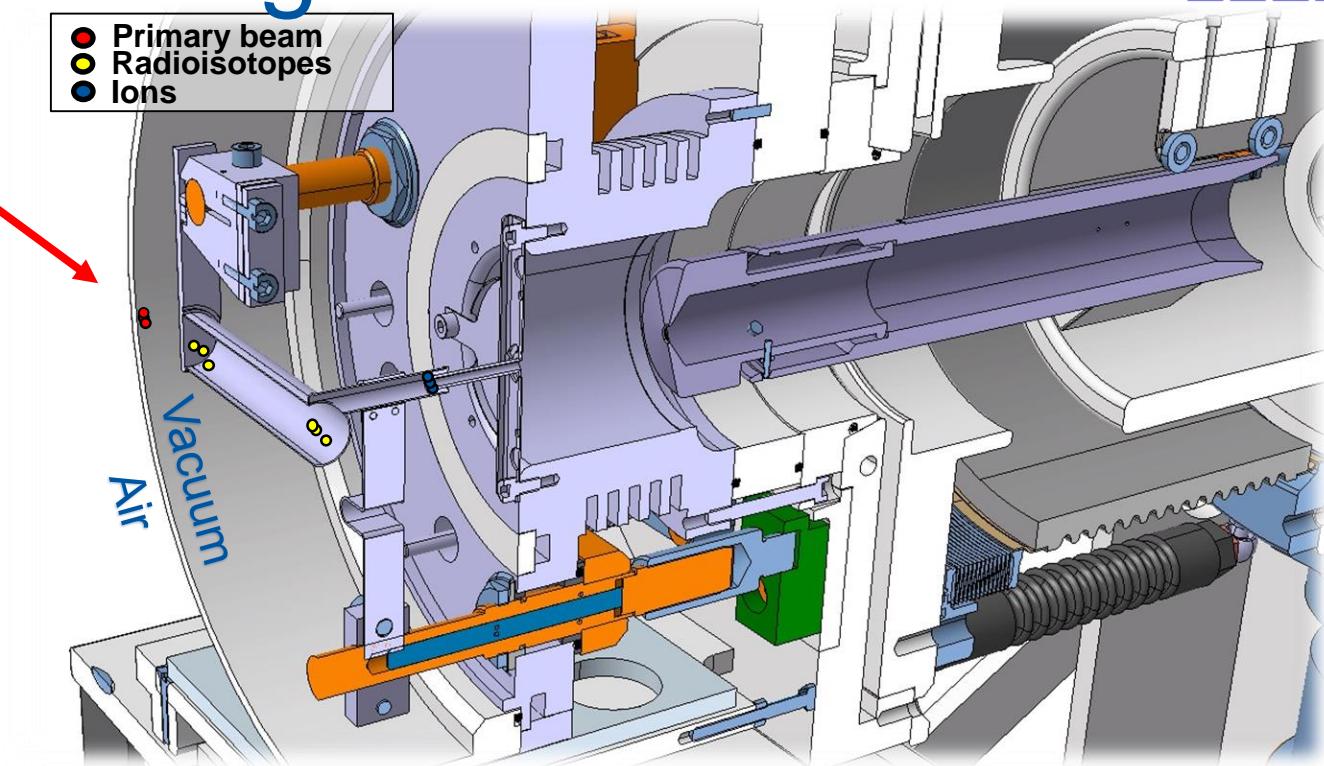

ISOLDE

Target Unit – Heart of MEDICIS

isOLDE

- Primary beam
- Radioisotopes
- Ions

*picture and animation courtesy of M. Delonca

$$\text{Beam Int.} = \sigma \cdot j \cdot N_t \cdot \varepsilon$$

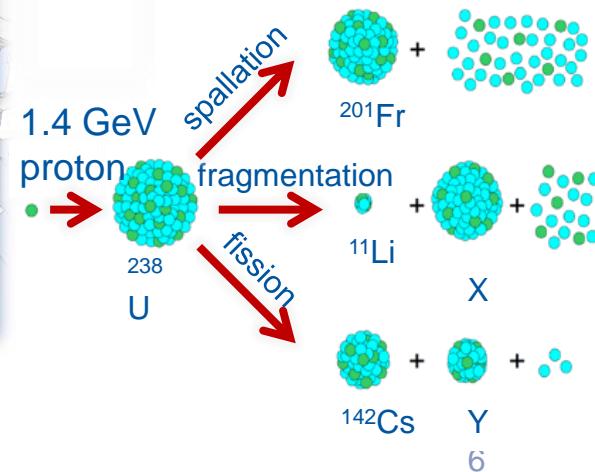

$$\varepsilon = \varepsilon_{\text{diff}} \varepsilon_{\text{eff}} \varepsilon_{\text{is}} \varepsilon_{\text{sep}} \varepsilon_{\text{trans}}$$

N_t – Nr of exposed atoms [dim]

j – Proton flux [cm^{-2}]

σ – Cross section [mb]

ε – Efficiency [%]

Operation

Insert target

- 12 min – protons stopped
(only at HRS)

Irradiation

- Transparent to ISOLDE

Retrieve target

- 12 min – protons stopped
(only at HRS)

Decay

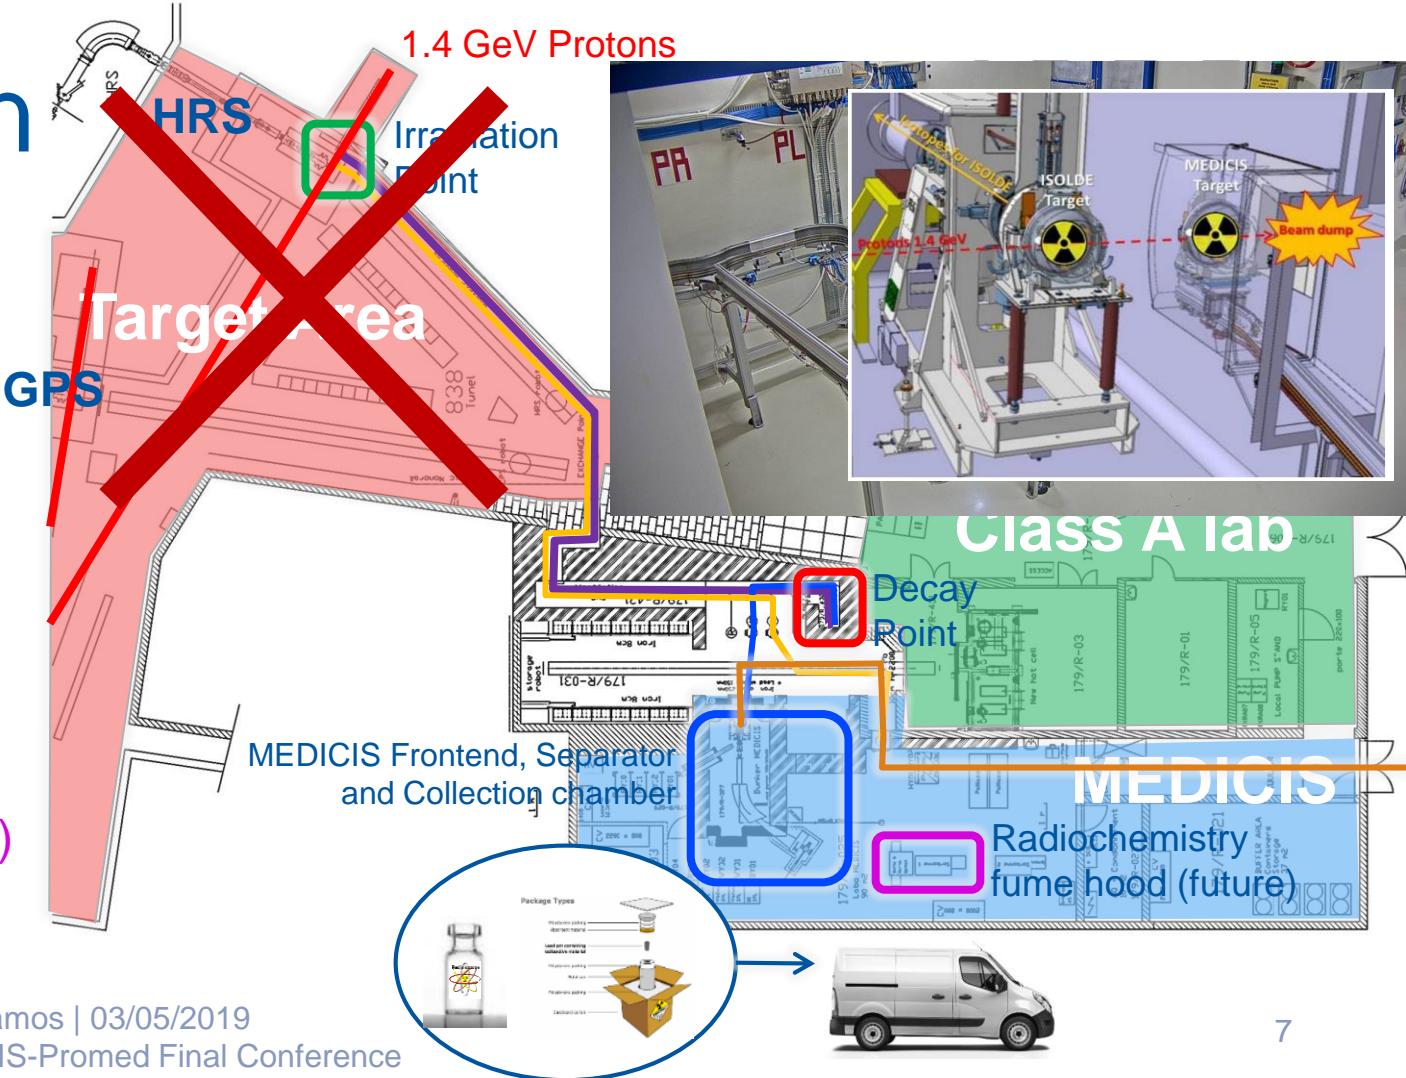

- Until target reaches $<1\text{Sv/h}$
(at 26 cm)

Install in Frontend

- Isotope Extraction

Radiochemistry (future)

- Chemical purification
- Shipping

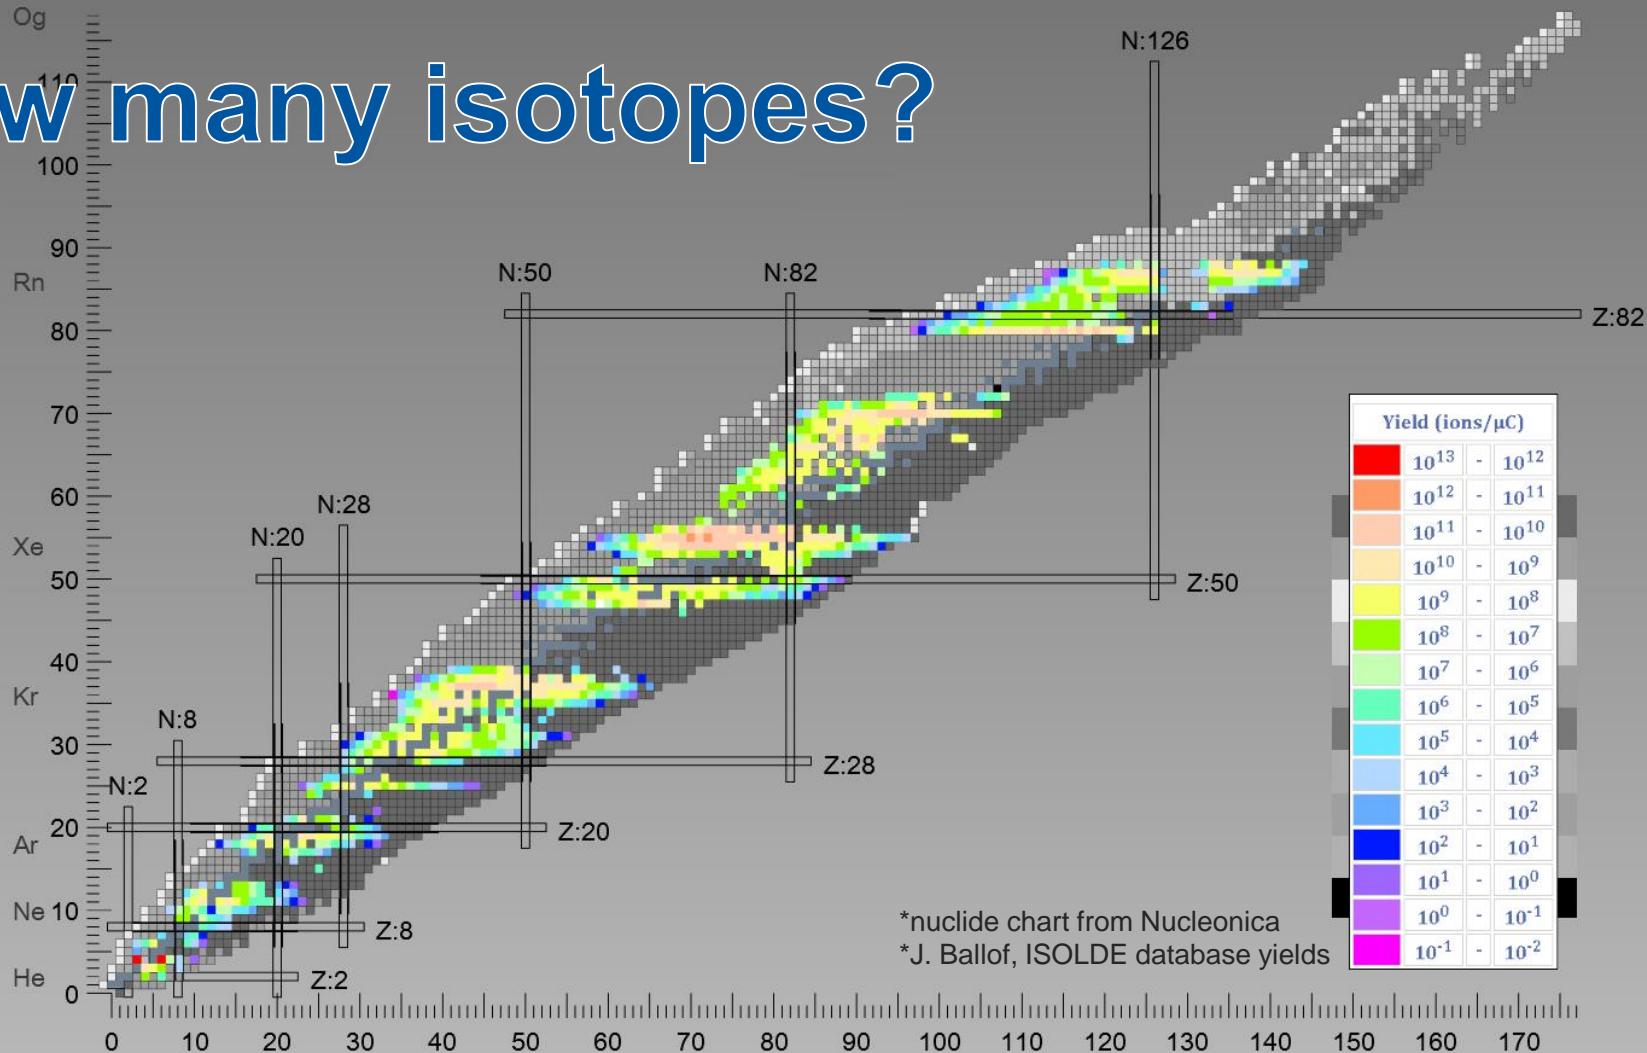

How many isotopes?

Predicted
~6000

Discovered
~3000

ISOLDE
~1000

Elements
74
 $t_{1/2}$
 $>\text{tens of ms}$

Isotopes

Cyclotron

Tb 149	4.2 m	ϵ	4.1 h
		β^+	α 3.97
		α 3.99	β^+ 1.8
		γ 796;	γ 352;
		165...	165...

Tb 152	4.2 m	ϵ	17.5 h
		γ 283;	ϵ
		160...	β^+ 2.8...
		ϵ ; β^+ ...	γ 344;
		γ 344;	586;
		411...	271...

MEDICIS-Promed Final Conference

MEDICIS Collaboration

J. P. Ramos | 03/05/2019
MEDICIS-Promed Final Conference

In the process of joining:

Two boards per year, for reporting, mission and proposal discussion

Collaboration funds MEDICIS operation and defines priorities

facility timeline

→ 2010 – Idea for facility

Oct-2014 – Building ready

Nov-2017 – First beam (stable)

→ 2011 – Concept and design started

Sep-2013 – Construction started

Mar-2015 kick-off
MEDICIS Promed

→ Dec-2017 – First radioactive beam

Feb-2018 – First collaboration board

May->Nov2018 – First operation year

Dec-2018 – Technical stop

May-2019 Lasers
Radiochemistry

**Operation with
external sources**

CERN Long -shutdown 2

Today

2018 operation and future plans

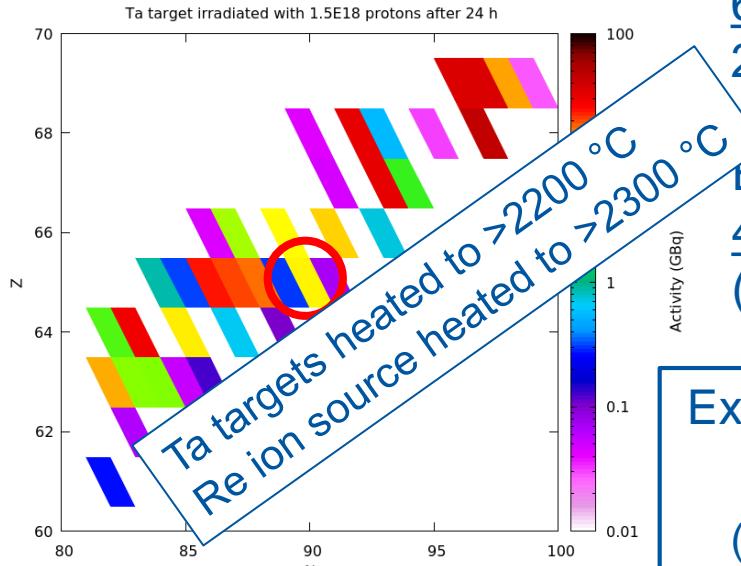

J. P. Ramos | 03/05/2019
MEDICIS-Promed Final Conference

MEDICIS Tb extraction efficiency

Already reached 5%
End of September

Irradiation for 2 days
(1.5E18 protons)

6.9 GBq – 155Tb
24 h after EoB

Extracted:
49.7 MBq
(5 days after EoB)

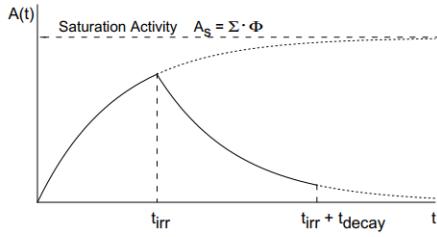

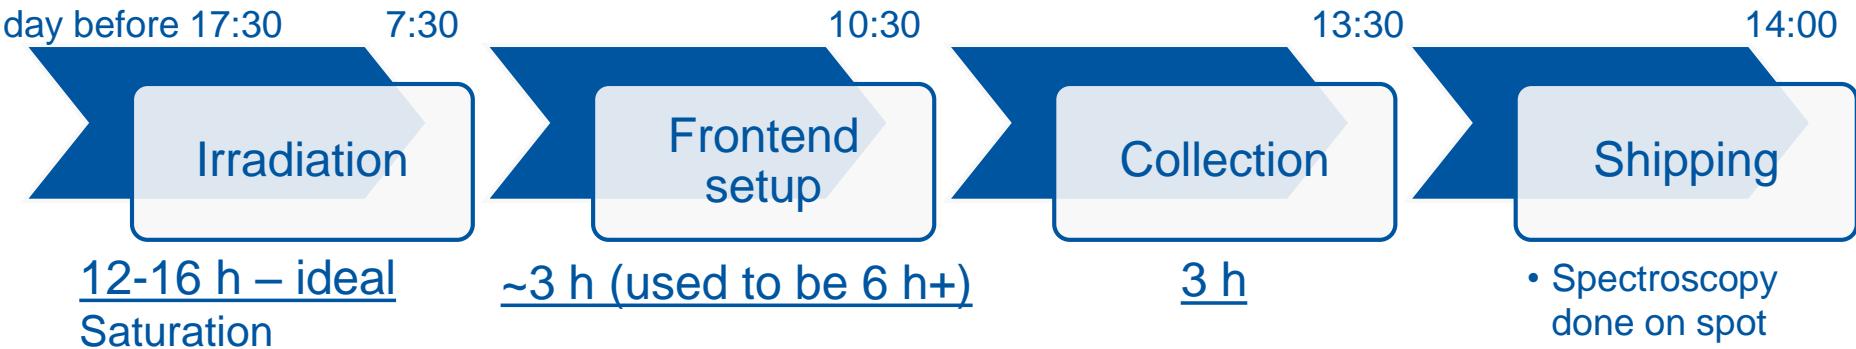

Extraction efficiency:
1.2%*
(4.1 GBq in target)

ISOLDE – 1.5% 149Tb
(600 MeV – 80s-90s)

**Lasers should
largely increase
this number**

*value fluctuates from target to target

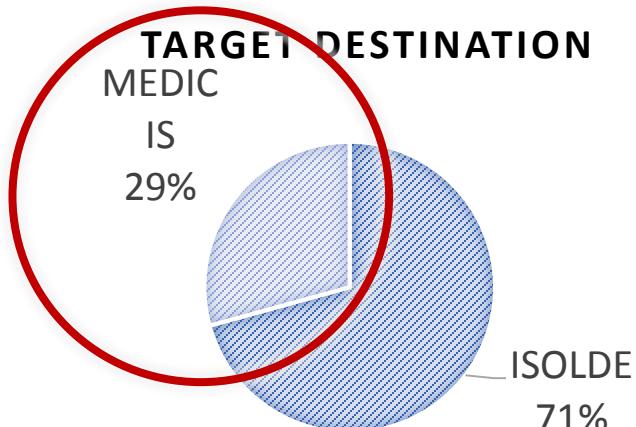

149Tb – race against time

1. Vacuum pumping (30 min)
2. Water cooling (HV operation) – used to be 4 h, now is 15 min
3. Target heating (~1.5 h)
4. Beam setup (with target below optimum release T) – 1h

Challenging! Need efficient coordination and good team!

Target production

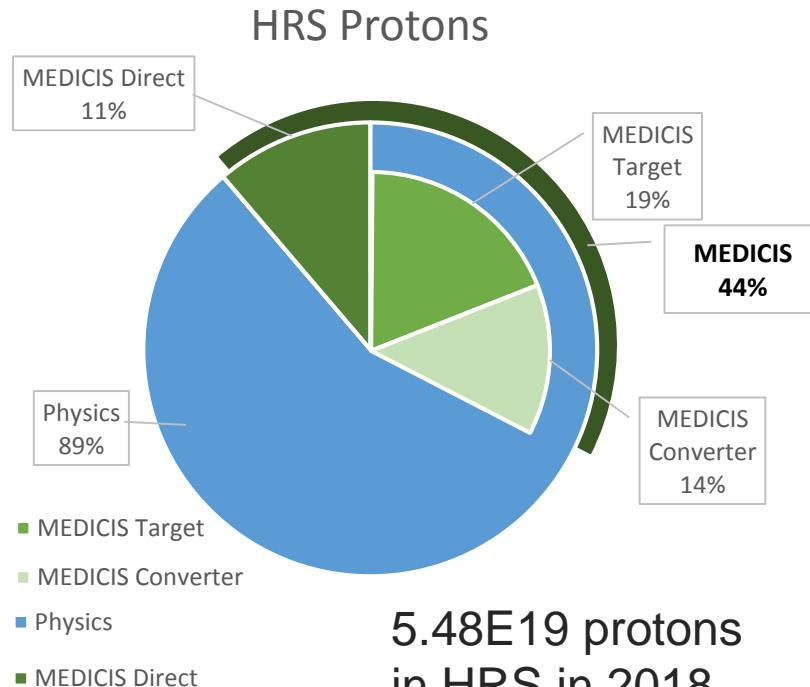

MEDICIS budget and manpower contribution

Total targets assembled end of 2018 : **49**

- Delivered to ISOLDE: **29**
- Delivered to MEDICIS: **10 + 2** in December
- Used for development: **8** (16%)

Targets reused up to 5 times!

Gaining operational experience (2018)

Main achievements:

- **155,152Tb**
- **149Tb (and 149Tb+16O)**
- **169Er** (external source)
- **11C**
- **165Tm**

4 isotope batches shipped:

- 2x to CHUV (CH)
- 2x to NPL (UK)

Up to 1GBq of extracted activity
has been handled at MEDICIS

MEDICIS

Machine development runs:

- Test Tb extraction runs (optimization) ✓
- Target oven prototype – needs improvement ✓
- 47ScF, 67Cu and 225Ra/Ac – technical issues with target units ✓

Issues during 2018:

- Frontend electrode stuck ✓
- Mass resolution at high masses ✓
- Collection chamber arm ✓

Start in 2 weeks with 2x 150 MBq of 155Tb sources from

Objective is to reach 1 GBq of ^{155}Tb source

169Er, 175Yb,
129mXe

Thank you! Merci! Obrigado! Grazie!

A big thanks to the MEDICIS local team (the dream team):

Thierry Stora (project leader), Cristina Ferrari (secretary), Richard Catherall (Section leader)

Radiochemistry: Moazam Khan, Nhat-Tan Vuong

Robot Operation: Giordano Lili, Giacomo Lunghi, Jean Luis Grenard

Safety: Ana Paula Bernades, Julien Riegert, Beatriz Conde Fernandez

Operation: Laura Lambert, Eric Chevallay, Pascal Fernier

Spectro and shipping: Nicolas Riggaz, Philippe Bertreix

RP: Fabio, Pozzi, Alexandre Dorsival, Matthieu Deschamps, Elodie Aubert

Engineering: Stefano Marzari, Vasileos Samothrakis, Vincent Barozier

LabVIEW and controls: Kevin Develle, Cedric Charrondiere, Christophe Mitifiot

ISOLDE: Karl Johnston and ISOLDE operation team

ISOLDE technicians: Julien Thiboud, Bernard Crepieux, Ermanno Barbero, Andres Vitez Suarez

Lasers (MELISSA): Valentine Fedosseev, Vadim Gadelshin, Bruce Marsh, Thomas Cocolios, Kristof Dockx, Klaus Wendt, Shane Wilkins

and Julien Para-Lopez, Simon Stegemann, Marco Buzio, Roberto Formento Cavaier, Simone Gilardoni, Jose Somoza,

MEDICIS Promed team (especially: Roberto Formento, Vadim Gadelshin, Simon Stegemann), the *MEDICIS Collaboration* (especially: Thomas Cocolios, Ulli Koester, Ferid Haddad, Nathalie Michel) and many others!
