MediNet

Monday 1 July 2019 11:10 (20 minutes)

MediNet, within ENSAR2, is a network that focuses on the development of tools to be used for medical applications and specifically on radiation therapy. The main emphasis is put on applications for ion-beam therapy with two distinct pillars: Research on detector instrumentation for radiation therapy and development of nuclear tools for the radiation quality characterization in ion-beam therapy.

Presenter: MAGRIN , Giulio (MedAustron, AU)

Session Classification: Workshop 1
