New prospects for BSM physics

Tuesday 24 September 2019 09:30 (30 minutes)

The recent hints of deviations from the SM in low-energy flavour-changing processes have shaken many prejudices about physics beyond the SM, opening new directions in model building. In this talk I will highlight some of these new directions, emphasising the key role of flavour physics, both at low and at high energies.

Presenter: ISIDORI, Gino (Universitaet Zuerich)

Session Classification: Flavor
