## **Copyright Sovereignty and Implications for New Limitations and Exceptions for Science**

*Thursday, 20 June 2019 09:00 (25 minutes)*

This presentation will review implications of the fundamental principle of copyright territoriality in an era of Open Science. It will examine recent national and regional developments in the area of copyright limitations and exceptions (L&Es), including emerging challenges in data governance arising from growing reliance on contracts and technological tools to both facilitate and restrict sustainable access to scientific knowledge.
