

OAI11 –CERN-UNIGE Workshop on Innovations in Scholarly Communication

Contribution ID: 109

Type: **not specified**

Bridging the World where Science is Performed and the World where Science is Published

Wednesday 19 June 2019 14:00 (30 minutes)

The EOSC was launched to propose the concretisation of the European scientific ecosystem as a combination of “horizontal efforts”, namely resource provision e-infrastructures (e.g. GEANT, EGI, EUDAT, OpenAIRE), and “vertical thematic efforts”, namely the Research Infrastructures, the EC cluster projects etc. This presentation will introduce the Research Community Dashboard services delivered and operated by the OpenAIRE infrastructure as a mean to transparently and smoothly connect the horizontal efforts, hence the digital laboratories where scientists carry out science, and the scholarly communication infrastructure, where scientific products should be published to enable sharing, discovery, scientific reward, and reproducibility of science.

Theme

Presenter: MANGHI, Paolo (CNR-ISTI –OpenAIRE Connect)

Session Classification: Session 1
