SLATE Monitoring Discussion

Monday, 21 January 2019 15:45 (1h 30m)

Discuss what SLATE should do about monitoring for at least two use-cases: 1) Monitoring for the SLATE application developer: what does the "SLATE pane of glass" provide for a developer and 2) Monitoring for the SLATE platform managers: what does the "SLATE pane of glass" provide for a platform deployer/manager?

Other cases?

How to monitor the network?
