Contribution ID: 45

Type: **Hardware assembling**

Drive r, φ .

Tuesday, 2 July 2019 13:50 (10 minutes)

Goal:

R & D (research and development) and implementation of a real prototype drive system for various sensors in the coordinate system: r, φ . We expect that a solution made in the technology of BOSCH aluminum profiles will be proposed, easy to adapt to various applications. We expect the designed solution to study areas up to $3mb \times 2\pi$. The drive system is National Instruments stepper motors, LabView control, Ethernet interfaces.
