

OASYS overview

Wednesday 5 June 2019 11:20 (20 minutes)

OASYS (OrAnge SYNchrotron Suite) is an open source, user friendly platform which collects all the most relevant software for the simulation of synchrotron radiation, such as XOP, SHADOW, SRW and others. This presentation will provide a quick overview on the software from the point of view of a user.

Presenter: TORINO, Laura (ESRF)
