

FCC build system update

Javier Cervantes Villanueva (EP-SFT)
FCCSW Meeting 08/02/2019

CMake configurations

Main changes:

- Usage of `${ROOT_LIBRARIES}`
 - Contains a list of libraries, but not all libraries built by ROOT
 - May include more libraries than needed, or not all libraries needed
 - It's better to use specific library targets exported by ROOT, like `ROOT::RIO`
- Usage of `include(${ROOT_USE_FILE})`
 - Necessary settings for linking against ROOT, otherwise need to be manually added
- Same libraries linked multiple times
 - Unneeded duplications
- Remove dependency of environment variables for dependencies (papas)
 - Not completely removed for all packages
- Allow tests to run after build phase
 - Rather than after the installation

Modified packages

- podio - [PR#68](#)
- papas - [PR#41](#)
- fcc-edm - [PR#92](#)

LCG 95 - release candidate

- Preparing new version of FCC externals (95.0.0) on top of it.
- Goals:
 - Full support for Centos7 (partial support so far)
 - Add new compiler: gcc8
- Relevant changes on LCG 95:
 - New package: spdlog-1.2.0 (tricktrack uses/provides it?)
 - ROOT: 6.14.08 → 6.16.00
 - New package: pythia8-240
 - DD4hep: 01.08 → 01.10
 - Geant4: **will not be part of the LCG Release any more**
 - [Full list of changes](#) * Not all included on this particular file *(Second version of release candidate coming)*
- * **Having some issues with Podio so far**

FCC 95.0.0 - Content

94.0.0

fcc-edm - 0.5.2

papas - 1.2.0

podio - 0.8

fcc-physics - 0.2.1

acts-core - 0.07.01

heppy - v2.0

geant4 - <None>

gaudi - v29r2

tricktrack - 1.0.6

95.0.0

→ Need new tag *BUT 0.5.3 was incompatible (**)

→ Need new tag

→ Need new tag *

→ 0.2.1

→ 0.07.01

→ v2.0

→ 10.05 (?)

→ 30.5 (?) (v29r2 too old to work with ROOT-v6.16)

→ 1.0.7 (?)

Podio

- Repository transferred from Benedikt's account to [AIDASoft](#)
- Some changes and new version 0.9
 - [Release notes](#)
- HEP-FCC/podio and AIDASoft/podio
 - Two different versions
 - Different changes on each fork
 - Should we move to AIDASoft?
 - Should we at least bring all their changes?
