

Welcome to the 12th International Conference on Position Sensitive Detectors

The conference series started as the London Conference and is the sister conference to the Vienna Conference on Instrumentation (next: 21-25 February <https://vci2022.hephy.at/>) with which it is normally 18 months out of phase.

The previous venues were: UCL London (1987); IC London(1990); Brunel University, London (1993); University of Manchester (1996); UCL London (1999); Leicester University (2002); University of Liverpool (2005); Glasgow University (2008); Aberystwyth University (2011); Surrey University (2014) and Open University (2017)

All sessions are plenary and this is the first time with virtual participation

All plenary sessions will take place on zoom (please use the raise hand function if joined remotely to indicate a question to the chairs).

Please use the virtual platform to network in the meeting hub, view the industrial exhibition, and to view and join the poster sessions from Wednesday.

Some tips for use:

- When you are moving around the platform and you want to return to the homepage, use the 'back to timeline' button in the top left corner. If you use the back button on your browser you will be taken away from the platform and you will need to log back in.
- If you are having any problems you can click on the red live support button, at the top right of your screen.
- Please do remember to login to the virtual platform during breaks particularly if you have just been presenting so remote follow up questions are possible.

12th International Conference on **POSITION SENSITIVE DETECTORS**

Hosted by
**UNIVERSITY OF
BIRMINGHAM**

Remote Connections for PSD12

The conference aims to create as immersive and environment as possible for running in a hybrid mode and therefore we ask all delegates to log into the [virtual platform](#) and especially request this of all presenters to facilitate “coffee break” style discussions with all participants, particularly those only able to join remotely. This platform will also provide the main forum for the Poster Sessions and the Industrial Exhibition. Please check your email for the message to you from the [PSD Organising Committee](#) for login instructions.

For the Plenary Oral Sessions the conference will in addition use Zoom with meeting URL: <https://bham-ac-uk.zoom.us/j/83078772759?pwd=VjVzM3cxMjZQSEIMMFlvSnNHVTZYQT09>.

The passcode for the Zoom session has also been sent in the message mentioned above. Please do not circulate this. If you cannot find or did not receive the relevant email or need any other assistance please contact the conference [helpdesk](#).

12th International Conference on
**POSITION SENSITIVE
DETECTORS**

Hosted by
**UNIVERSITY OF
BIRMINGHAM**

Scientific Themes

- X-ray and Gamma Ray Detectors
- Applications in Life Sciences and Biology
- Applications in Astronomy, Planetary and Space Science
- Applications in Security and Environmental Imaging
- Applications in Nuclear Physics and Nuclear Industry
- Applications in Particle Physics
- Applications in Astro-particle Physics
- Applications in Condensed Matter
- Novel Ionising Radiation Detection Systems
- Medical Applications of Position Sensitive Detectors
- Detectors for Neutron Facilities
- Detectors for High Radiation and Extreme Environments
- Advances in Pixel Detectors and Integration Technologies
- Gas-based Detectors
- Detectors for FELs, Synchrotrons and other Advanced Light Sources
- Position Sensitive Fast Timing Detectors
