

Student Projects ESHEP 2019

-- *Results* --

Nick Ellis and Martijn Mulders
(CERN)

*Thanks everybody for the truly
amazing talks !!*

By working together in the collaborative group projects you all succeeded to prepare well-structured, inspiring and original outreach-style talks, in the short amount of “free” time available during the School.

According to the Jury, and confirmed independently by the public vote (with one vote per group), the winning presentation was:

GROUP D

“ 42% ” (interview with Mr. Neutrino)

Congratulations group D!

and: thanks to the Jury for the constructive feedback
