

ECAL/HCAL local reconstruction

First day

Apr 15th

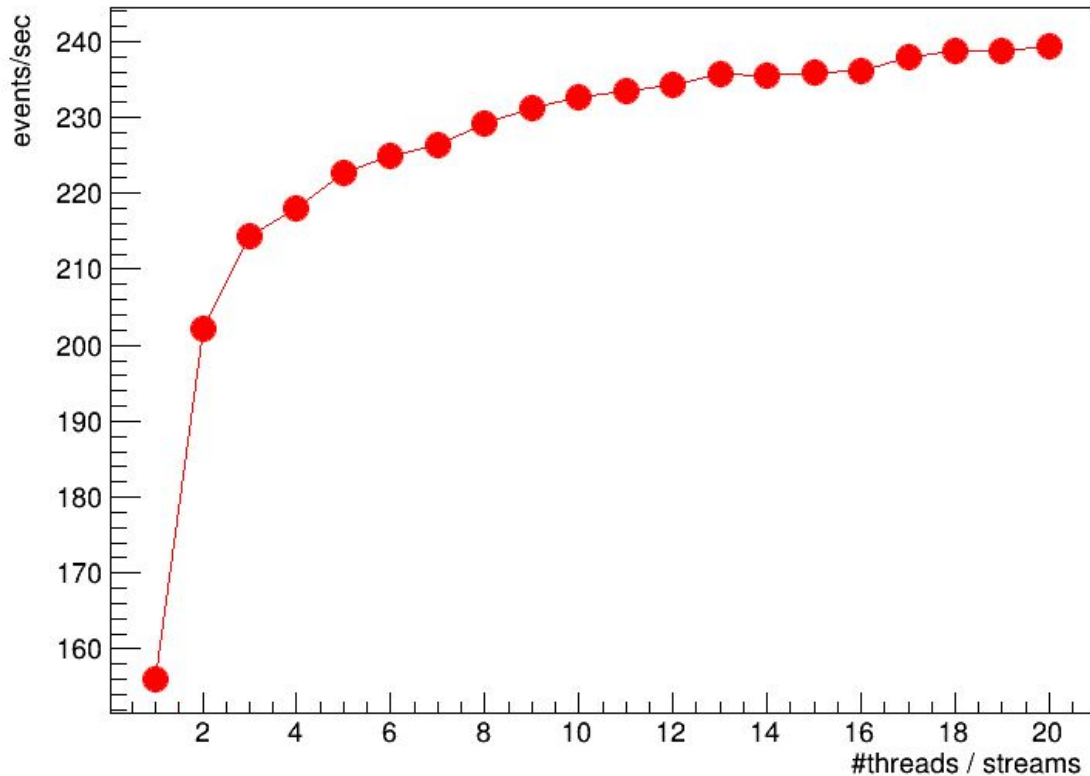

Maria, Viktor, Andrea

Current implementation for ECAL

With cms-patatrack/patatrack-scripts.git

gpu GTX 1080

HLT config

Work is ongoing

- For 2018 data 50% is spent rearranging conditions
 - Almost refactored with patatrack CUDAES/ED....
 - Only event data transfer per event / conditions per iov
- Remeasure the throughput
- Prolly raw2digi needs to be ported...
