About the host – eInfraCentral

- Coordination and Support Action (CSA) in Horizon 2020 Programmme (INFRASUPP-03-2016-b-3 call)
- Implementation period: January 2017 – June 2019 (30 months)
- 9 partners, including 5 major e-infrastructures
- Effort: 138.5 PMs, Budget: €1.5m€

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 731049

Mission

Ensure, that by 2020, a broader and more varied set of users discovers and accesses the existing and emerging Services and Resources for Research

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 731049

Core Objectives and Key Results

Structure an open and guided discussion to consensually define a **common catalogue for their services and resources**	Reached consensus initially with 5 key e-Infras on standard description of services and resources and APIs. Now extended to 15+
Develop a **web platform** to act as the gateway for researchers to browse the catalogue of services and solve the “last mile” problem	Developed a production view of the EOSC Catalogue with 250+ services and resources
Capture and draw policy and sustainability lessons for the development of the **EOSC**	Lessons from building the catalogue and work with SPs fed into the EOSC Portal development and into new CatRIS project
