HEP Workload Benchmarks: Design/Development

Tuesday, 15 October 2019 17:00 (25 minutes)

In this presentation we'll discuss the design architecture of the HEP Workload benchmark containers, and the proposed replacement for HEPSPEC06, which is based on these containers. We'll also highlight the development efforts which have been completed thus far, and the tooling being used by the project. Finally we'll detail our plan for extending the the existing container benchmark suite to include support for GPU benchmarking.
