

Federated ID/SSO at BNL's SDCC

Thursday 17 October 2019 10:15 (25 minutes)

BNL SDCC(Sentific Data and Computing Center) recently enabled SSO authentication strategy using Keycloak, supporting various SSO authentication protocols(SAML/OIDC/OAuth), and allowing multiple authentication options provided under one umbrella including Kerberos Auth, AD(Active Directory) and Federated Identity Authentication via CILogon with Incommon and social provider login. This solution has been integrated to recent tools/services deployment in the facility for protected resource access and delivered the efficiency in the areas of AuthN/AuthZ.This talk will focus on technical overviews and strategies to tackle the challenges/obstacles for this solution.
