What's new in HTCondor? What's coming up?

Tuesday 15 October 2019 14:25 (25 minutes)

The goal of the HTCondor team is to to develop, implement, deploy, and evaluate mechanisms and policies that support High Throughput Computing (HTC) on large collections of distributively owned computing resources. Increasingly, the work performed by the HTCondor developers is being driven by its partnership with the High Energy Physics (HEP) community.

This talk will present recent changes and enhancements to HTCondor, including details on some of the enhancements created in recent releases, changes created on behalf of the HEP community, and the upcoming HTCondor development roadmap. We seek to solicit feedback on the roadmap from HEPiX attendees.

Speaker release

Yes

Desired slot length

Author: TANNENBAUM, Todd (University of Wisconsin Madison (US))

Presenter: TANNENBAUM, Todd (University of Wisconsin Madison (US))

Session Classification: Computing and Batch Services

Track Classification: Computing & Batch Services
