

An update on Cyber Security at Diamond Light Source

Sunday 6 October 2019 10:30 (30 minutes)

An increased awareness of the threat from ineffective cyber security has simulated Diamond Light Source to assess how cyber security is managed. I will explain the drivers and process we are going through to achieve this. I will also touch on what I see as some of the open issues we all face in effective management of cyber security in large scientific facilities.

Summary

Presenter: Mr HERON, Mark (Diamond)
