

# LHC Luminosity optimisation and operation schemes

*Tuesday 4 June 2019 09:15 (25 minutes)*

Overview of operations in Run 2:

- beam types and filling schemes,
- luminosity -leveling and anti-leveling schemes,
- scans for luminosity (lumi server): vdM fills, emittance scan algorithms, special fills...

**Presenter:** HOSTETTLER, Michi (CERN)

**Session Classification:** Session 1a
