

# LHC beam orbit and collision position determination & control –performance and issues, prospects for Run 3

*Tuesday 4 June 2019 15:00 (15 minutes)*

Discuss from the operations and machine point of view

- orbit drifts in vdM and physics fills,
- scan and x-ing angle precision
- what would be different in Run 3?

**Presenter:** Dr WENNINGER, Jorg (CERN)

**Session Classification:** Session 2a
