EGI feedback on future support to DPM

Alessandro Paolini

EGI Foundation

The work of the EGI Foundation
is partly funded by the European Commission
under H2020 Framework Programme

- The white paper was reviewed favorably within EGI and it helped us to propose the following way of support
- EGI proposes continuing to support DPM related activities as it has in the past - as part of the UMD:
 - promotion of it as a solution to EGI communities
 - security related work
 - requirements gathering
 - help with upgrade campaigns and other aspects of operations
- This work can be included in the EGI/WLCG MoU which is being updated this year.

- We are also considering funding up to **6PM/yr** of effort within the latest iteration of the funding simulations as part of the **infraeosc07a1 project proposal** to contribute to development of DPM or any other aspects of DPM activities that would benefit from this funding.

- Is this aligned with what the DPM people's expectations are of EGI?
- Do you think we can help with anything else?
 - or you don't foresee any help to be needed with some of the things mentioned?

- Keep in touch with Matthew / Gergely / EGI Operations

EGI: Advanced Computing for Research

Thank you
for your attention.
