

FCAL Workshop DESY 2019

IB report

Wolfgang Lohmann

Testbeam

- We need a certain amount of people. Who will come from which lab

Experienced people:

Sergey will be the 'Field manager'

Itamar, Many, Yan, Hans, Jacob, Alexandr, Veta

Potential support from LUXE: Marina and Sasha

In addition: Ivan, Leila, 1 more person from JINR
Students from Kiev ? No funding from TA.

Testbeam

- MC estimates and TB data analysis – who can do what

MC: Alina will start in November with MC for the testbeam setup

Testbeam data analysis: these data are available for all labs, and effort is needed to organise the data analysis

Conferences

- LCWS end of October/1 Nov.
we should send an abstract, and somebody should give a talk

We agreed to send at least 2 abstracts, one general about FCAL results, and one about the technologies developed and applied in the testbam.

Ivanka volunteered to give the first presentation, for the second a speaker must be find. Very likely this talk has to be given remotely.

Conferences

- CEPC Nov. 18-20 Workshop Beijing
Hongbo invited us to make a general presentation about FCAL. Halina will be asked. Potential Yan would be interested.

Next FCAL workshop

Konrad informed us that an FCAL workshop in spring 2020 at CERN cannot be organised

Several options were discussed :

- Only one WS per year at DESY
this might work when the hard- and software meetings are made more frequently
- Finding other places
e.g. Ivanka offered Belgrade as a potential venue,
Anton also offered Tomsk
potentially two workshops at DESY would be possible
It was agreed to think a bit about the situation and come to a conclusion within the next weeks.
