

Wun Kwan Yam
CERN Summer Student (EP-AID-DT)

Summer Student Session 2019
5 August 2019

My name is Wun Kwan Yam, and I come from Hong Kong, China. I am currently studying for a Bachelor of Science in Physics and Mathematics at The Hong Kong University of Science and Technology.

During the summer student program, I have been working in the High Momentum Particle Identification Detector (HMPID) group of the A Large Ion Collider Experiment (ALICE) collaboration. After CERN, I hope to continue studies and complete a PhD in physics.

What I enjoyed most as a summer student was the opportunity to interact with the diverse community at CERN.
