

DSS Castor data growth

- Data written to tape – last month (1 k GiB = 1 TB = 1 tape)

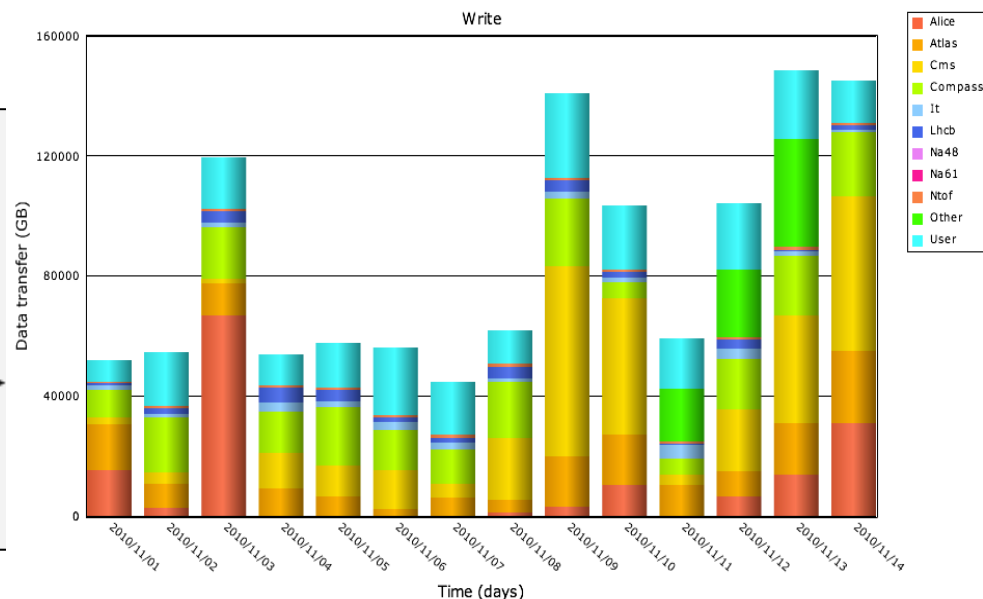

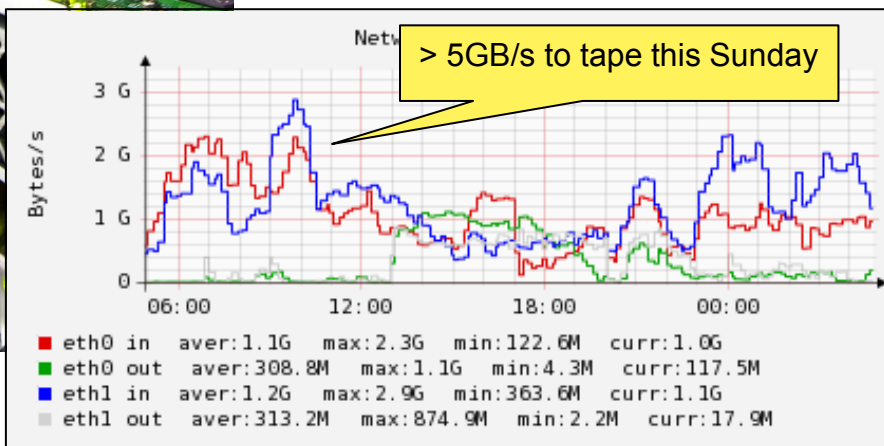

Oct 2009 to April 2010:
0.7 PB/month (23 1TB tapes / day)

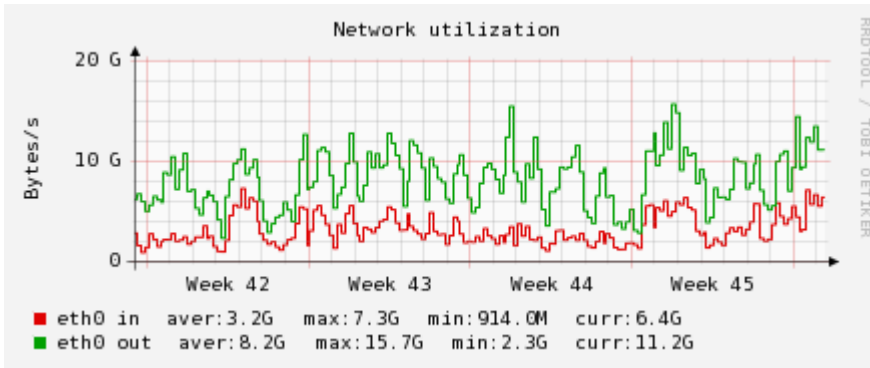

May 2010 to October:
1.9 PB/month (62 1TB tapes / day)

November (Heavy Ion run) :
~ 3-4PB ? (120 1TB tapes / day)

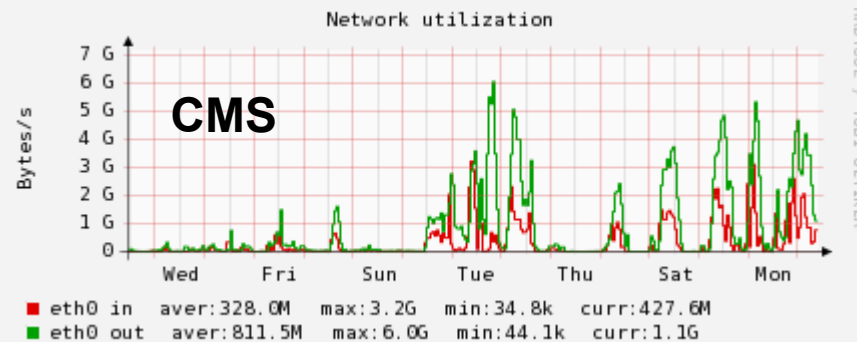

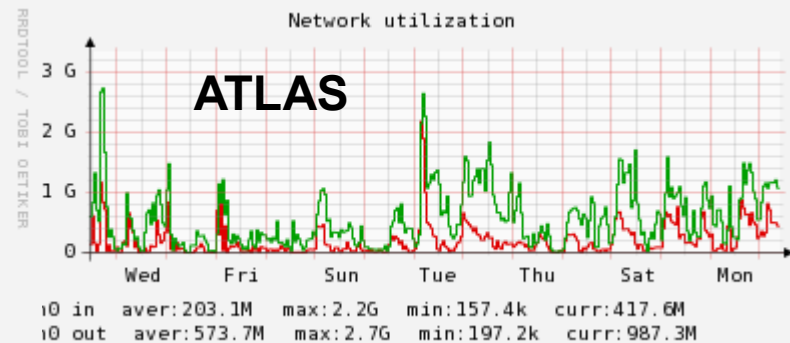

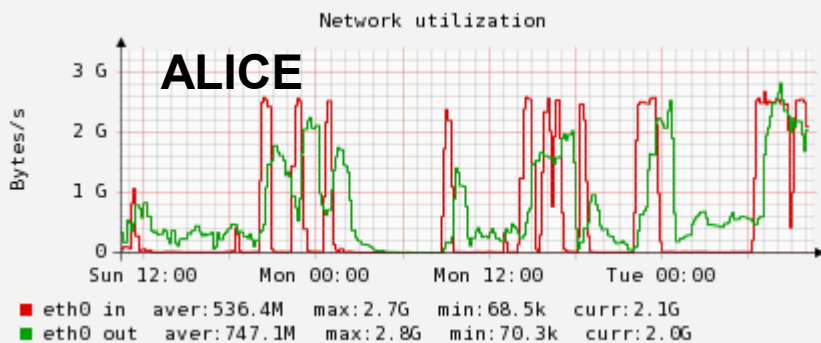

- Heavy Ion run going on smoothly at impressive data rates:

Disk Servers (Gbytes/s) – last month

Per experiment – last 2 weeks

- As normal
