

Welcome!

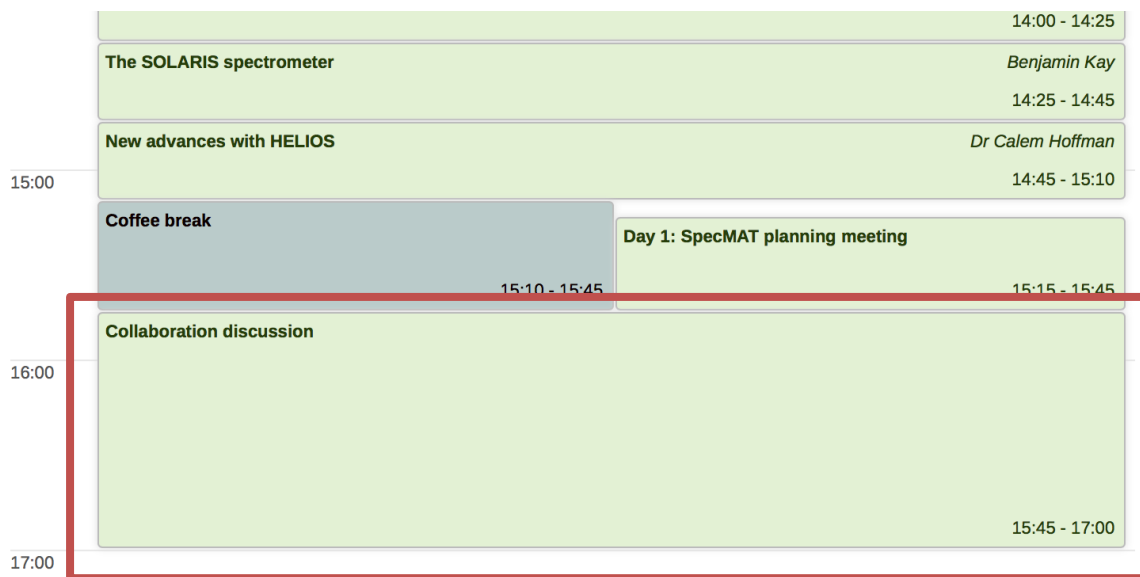

ISOLDE SOLENOIDAL  
SPECTROMETER WORKSHOP

27<sup>th</sup>-28<sup>th</sup> August

# Workshop aims

- Give an overview to the community of the ISS project.
  - Status of the project.
  - Outcome of early exploitation phase.
  - Future plans.
  - Collaboration structures, processes and strategy.

## Workshop aims

- Give an overview to the community of the ISS project.
  - Status of the project.
  - Outcome of early exploitation phase.
  - Future plans.
  - Collaboration structures, processes and strategy.
- Stimulate discussion of ideas for physics exploitation after LS2.
  - Technological developments.
  - Exploitation of the current device.

## Workshop aims

- Prompt conversation on approaches for probing the fission process in inverse kinematics.
  - Workshop funded by UK-NDN.
  - Transfer reactions offer another way of accessing fissioning systems.
  - Interest in measuring these reactions in many different ways at different laboratories.
  - Dedicated session tomorrow.

## Housekeeping

- Please load talks on to indico or on the computer.
- Please stand by microphone when presenting.
- Please use microphone to ask questions.
- Refreshments and lunch served in the atrium of the Central Teaching Laboratories.
- In case of fire leave by nearest stair case and meet in the front of the Chadwick Building.

# Housekeeping

- Workshop dinner – Hope Street Hotel, 40 Hope St – 7PM.
