Dear Myeongjae,  
I'm reporting the progress of WG2 organization :  
We plan to have reports on  
-recent theoretical developments on neutrino scattering  
-recent experimental results  
-we're reserving two time slots for reports on the Trento workshops of the coming weeks  
-WG1+2 joined sessions

We are awaiting final decisions on the plenaries before sending invites to avoid double invitations. For the organization of the WG1+2 joined session it is important to know the view on the organization of new detector technologies discussions. Are the WG1+2 conveners to decide about these or are others involved ?

Kind regards,  
Natalie, for WG2.

---
