

Introduction to container orchestration and hands-on minikube + group work on container orchestration

Sunday 6 October 2019 14:00 (1h 30m)

General presentation of container orchestration and practical hands-on session with minikube, a small distribution of the Kubernetes control plane.

Using the six thinking hats methodology, we will explore possible use of container orchestration within controls systems.

Presenter: VOIRIN, Remi (CERN)
